REPORT SECTION
The report section that follows gives an account of the college activities for the academic year 2013-2014. It contains the annual reports of the various departments and committees of the college.

The activities of the college depict the bubbling enthusiasm and dynamism of the students and professors alike. This very enthusiasm to excel in myriad fields—be it in academics, sports, technical, literary, creative or cultural activities—is a sign of the pace at which our college is progressing.

From the Dean of Academics

It gives me great pleasure to inform you about the progress in academics and the training & placement activities for the current academic year. Under the great vision of Management of VCET and strong leadership of our Principal, Dr. Ashok V. Bhonsale, we were able to initiate many measures to improve academic performance and placement record of our students.

We at VCET established an academic process to bring uniformity amongst all departments mainly in terms of classroom teaching, practical sessions and internal exam conduction. We are working towards a more 'student centric' approach from faculty and administration. We are in progress of introducing an ERP system for better monitoring of student’s progress for better understanding of their problems.

Our exam results and internal tests results are continuously monitored and analyzed. The students are given counseling on their performance and steps are taken to improve their results.

Parents are informed about their wards progress from time to time and also about the importance of training for placements right from second year level.

By organizing and taking part in various co-curricular and technical activities through student chapters and forums of CSI, IEEE, IETE, ISA, ISHARE, ASME etc. and various other extracurricular activities, students can follow their curiosity to explore new things, encounter new ideas and discover their own capabilities.

Faculty is motivated to pursue higher studies and oriented towards solving student problems, enhance research and development activities, and understand the intellectual property rights and patents application processes.

We had excellent academic results and I congratulate the students across all departments who obtained various meritorious positions including Rank #1 at University level. The summary of results and achievements of faculty and students is given in the individual departmental reports. I thank all department heads and section heads for their full cooperation and inputs to implement the processes.

A lot of work is in the pipeline to enhance quality of our education system to bring it on par with the guidelines and norms of The National Board of Accreditation. We have a new Placement and Training team which is working day and night to improve our placements by training students for the stages of the recruitment process like aptitude test, group discussions and interview. I hope the team will give great results in future.

We also organized a grand alumni meet in February as a part of the birth centenary year celebrations of our founder, Shri Bhausaheb Vartak. The interaction and feedback from Alumni was helpful for us.

We faced many challenges in this academic year, and there will be many to come. It is how we face those challenges and overcome them that measure how well we maintain and build the reputation of VCET. I am confident that we will continue to push forward on every level.

Dr. Vikas Gupta
Dean, Academics
Prof. Swapna Borde (Faculty of Computer Engineering Department) has been awarded Ph.D degree in Engineering from NMIMS University, Mumbai. The topic of her research was “Content Based Image Retrieval using Spatial and Transform Domain Clustering”. She has carried out her research work under the guidance of Dr. Udhav Bhosle, Principal Rajiv Gandhi Institute of Technology, Mumbai. She published several research papers in International Journals.
