

# Vidyavardhini's College of Engineering & Technology

Founder President Late Padmashri H. G. Vartak

Approved by AICTE, DTE Maharashtra and Affiliated to University of Mumbai

NAAC accredited, 4 Programmes Accredited by NBA

**Criteria Number:** 2

**Criteria Name:** Teaching, Learning and Evaluation

**Sub-criteria Number:** 2.5

**Sub-criteria Name:** Evaluation Process and Reforms

2.5.1 Mechanism of internal/ external assessment is transparent and the grievance redressal system is time-bound and efficient

**UNDERTAKING**

I, \_\_\_\_\_  
 student of \_\_\_\_\_ College  
 appeared at the \_\_\_\_\_ examination with  
 Seat No. \_\_\_\_\_ willingly giving the following undertaking for obtaining the photocopy  
 of my answer-book.

I shall abide by the rules and regulations in respect of the availability of photocopy of the answer-book and I shall not violate these rules and regulations by using the photocopy for any other purpose except for my exclusive and relevant use.

**Signature of the Candidate**

\_\_\_\_\_

**Certificate for the S.C., S.T., D.T./N.T. and E.B.C. Students**

This is to certify that Shri/Smt./Kum. \_\_\_\_\_  
 is/was a bonafide student of this College/Department/Institute during the year/s and he/she was getting the  
 concession in tuition fees and other fees as he/she is/was belonging to Economically Backward Class i.e.  
 his/her parental income is Rs. \_\_\_\_\_ /- or less per annum or he/she is/was belonging to Scheduled  
 Caste/Scheduled Tribe/Denotified and Nomadic Tribe. He/She is therefore, eligible to get the concession  
 in the fee for photocopy of answer-books.

I forward herewith certified xerox copy of the caste certificate submitted by him/her.

The above information to the best of my knowledge is true, correct as per the college record.

Name of the College/Department/Institute : \_\_\_\_\_

**Signature of the Principal,**

Class : \_\_\_\_\_ Div. : \_\_\_\_\_

Year : \_\_\_\_\_

**College Stamp**

**UNDERTAKING**

I hereby undertake that the results of the revaluation of my answer-book/s shall be binding on me and that I shall accept the revised marks assigned to my paper/s.

Mumbai,

\_\_\_\_\_  
Signature of the Candidate

Date :

**DETAILS REGARDING APPLICANTS RESULT AT THE LOWER EXAMINATION  
CONDUCTED BY THIS UNIVERSITY/COLLEGE**

Name of the Lower Examination :

Month & Year :

Seat No. :

Result :

(Whether passed/failed or held in Reserve)

**(Attach xerox copy)**

Candidate must necessarily write in the column mentioned above the Seat No. Month and Year of Passing the Lower Examination.

**CERTIFICATE FOR THE S.C., S.T., D.T./N.T. AND E.B.C. STUDENTS**

This is to certify that Shri/Smt./Kum. \_\_\_\_\_ is/was a bonafide student of this college during the year/s and he/she was getting the concession in tuition fees and other fees as he/she is/was belonging to Economically Backward Class i.e. his/her parental income is ₹ 15,000/- or less per annum or he/she is/was belonging to Scheduled Caste/Scheduled Tribe/Denotified and Nomadic Tribe. He/She is therefore, eligible to get the concession in the fee for Revaluation of answerbooks.

I forward herewith certified xerox copy of the caste certificate submitted by him/her.

The above information is to the best of my knowledge true, correct as per the college record.

Name of the College : \_\_\_\_\_

Department of Computer Engineering  
Academic Year : 2022-23 (Odd Sem)

Sr. No.	Key	SQL	NoSQL
1	Type	SQL database is generally classified as a Relational database i.e. RDBMS.	While NOSQL database is known as non-relational or distributed database.
2	Language	As we already know SQL uses structured query language for its CRUD operation which is defined as SQL. This makes SQL database to store data in more structured form and also preferred for more complex operations which could get completed with complex SQL queries.	NoSQL database on other hand has dynamic schema for unstructured data. Data stored in this type of database is not structured and could be stored in either of forms such as document-oriented, column-oriented, graph-based or organized as a Key Value store. This syntax can be varied from DB to DB.
3	Scalability	SQL database can extend its capacity on single server by increasing things like RAM, CPU or SSD i.e we can say that SQL dbs could be scalable in vertical as their storage could be increase for the same server by enhancing its storage components.	In order to increase the capacity of NOSQL dbs we required to install new servers parallel to the parent server i.e NOSQL dbs could be scalable in horizontal and this made them more preferable choice for large or ever-changing data sets.

Each Point (1M)

Vidyavardhini's College of Engineering and Technology  
Department of Computer Engineering  
Academic Year : 2022-23 (Odd Sem)

4	Internal implementation	SQL follows ACID properties for its operations which is abbreviation of Atomicity, Consistency, Isolation and Durability.	On other hand NOSQL is based on Brewers CAP theorem which maily focus on Consistency, Availability and Partition tolerance.
5	Performance and suited for	SQL databases are best suited for complex queries but are not preferred for hierarchical large data storage.	NoSQL databases are not so good for complex queries because these are not as powerful as SQL queries but are best suited for hierarchical large data storage.
6	Examples	SQL dbs is implemented in both open source and commercial Database such as like Postgres & MySQL as open source and Oracle and Sqlite as commercial.	On other hand NOSQL is purely open source and MongoDB, BigTable, Redis, RavenDB, Cassandra, Hbase, Neo4j, CouchDB are the main implementation of it.

2)BASE Transactions ensures the properties like Basically Available, Soft State, and Eventual Consistency. Justify what is soft state of any system and how it is depend on Eventual Consistency property.

BASE is a term that refers to database processing in a NoSQL database, such as a data lake.

Basically Available: It means that in the event of failure the system is guaranteed to be available.

Soft State: It means the state of teh data can be changed with interacting with the application.

\*Eventual Consistency: It means, after the application input, the system will gradually become consistent. The data will be duplicated over several nodes until it reaches a consistent state. At the transaction level, however, consistency is not ensured.

Academic Year : 2022-23 (Odd Sem)

**Soft state indicates that the state of the system may change over time, even without input.**

This is because of the eventual consistency model. Eventual consistency indicates that the system will become consistent over time. Basically Available, Soft State, Eventual Consistency, also known as BASE, is a model that balances the trade-offs between data consistency and availability. It contrasts with the ACID model, which prioritizes strict consistency in database transactions. Here are three real-world examples of technologies or systems that employ BASE:

Amazon DynamoDB: Amazon's managed NoSQL database, DynamoDB, uses the BASE model to offer high availability and low latency performance. It ensures that data updates are eventually propagated across all nodes in the distributed system, allowing the system to continue processing requests even with temporary inconsistencies. Additionally, the soft state feature facilitates high availability, while the system reaches eventual consistency through the use of optimistic replication and conflict resolution mechanisms.

A) Answer the following questions

- 1) Use a Mongo DB command to find a book details of inserted records in formatted sequence.

```
db.book.find().pretty();
{
  "_id" : ObjectId("6150a1b2f945783949c3ffb5"),
  "bid" : 5,
  "bname" : "ADBMS priciples",
  "Author" : "Navathe",
  "edition" : 4
}
{
  "_id" : ObjectId("6150a40ef945783949c3ffb6"),
  "bid" : 2,
  "bname" : "DBMS priciples",
  "Author" : "korth",
  "edition" : 4
}
```

B) Solve the following questions (Any one)

- 1) Consider the following document schema for book (bid,bname,Author,edition)

- a) Display book whose edition that are greater than 3

A) Answer the following questions

1) Illustrate temporal databases for given schema EMP(Eid,ENAME,sal,dno) as

a) Transaction time temporal Database

A database fact is stored in a database at some point in time. A transaction time of a data fact is the time at which the information about a modelled object or event is stored in the database. The transaction time is automatically recorded by the DBMS and cannot be changed. If a fact is updated to a database at 10:15 on 4/2/1999, this transaction time never changes. If the data is changed at a later time, then a second transaction time is generated for the change, and so on. In this way a history of database changes based on transaction time timestamps is built up.

Eid	ENAME	Sal	dno	TST	TFT

1M

B) Solve the following questions (Any one)

1) Analyze and Model the College Management system as a graph database.

- Identify different labels, Nodes, relationship and respective properties.
- Draw a Graph model using the same.

2) Consider an example of a road map. A road map is a two-dimensional object that contains points, lines, and polygons that can represent cities, roads, and political boundaries. Justify which database is best for above example and how you can use queries and operators for the same situation.

Spatial data is associated with geographic locations such as cities, towns etc. A spatial database is optimized to store and query data representing objects. These are the objects which are defined in a geometric space.

#### Characteristics of Spatial Database

A spatial database system has the following characteristics

- It is a database system
- It offers spatial data types (SDTs) in its data model and query language.
- It supports spatial data types in its implementation, providing at least spatial indexing and efficient algorithms for spatial join.

#### Example

A road map is a visualization of geographic information. A road map is a 2-dimensional object which contains points, lines, and polygons that can represent cities, roads, and political boundaries such as states or provinces.

In general, spatial data can be of two types –

- Vector data: This data is represented as discrete points, lines and polygons
- Raster data: This data is represented as a matrix of square cells.

Any type of spatial data that is data related to location and which represents objects defined in a geometric space, is stored and maintained by **Spatial Databases**. These are used to handle these Spatial Databases. Spatial database mainly contain representation of simple geometric objects such as 3D objects, topological coverage, linear networks and TINs(Triangulated irregular networks).

There are mainly **three** types of spatial queries as given below.

1. **Nearness queries:**

It request objects that present near a specified location. A query to find all Hotels that lie within a given distance of a given point is an example of a nearness query. The nearest-neighbor query requests the object that is nearest to a specified point.

For example, we may want to find the nearest Railway station. Note that this query does not have to specify a limit on the distance, and hence we can ask it even if we have no idea how far the nearest Railway station lies.

2. **Region queries:**

It deal with spatial regions. For example, a query can ask for objects that is present partially or completely within a fixed region. A query to find all medicine shops within the geographic boundaries of a given town or we can find all the available school in a particular city.

3. **Union/Intersection:**

In this type of queries, we may also request intersections and unions of regions.

For example, given region information, such as annual rainfall and population density, a query may request all regions with a low annual rainfall as well as a high population density.

In general, there is a combination of **spatial and Non spatial requirements** in the queries on spatial data . For example, we may want to find the nearest restaurant that has vegetarian selections and that charges less than \$10 for a meal.

Since spatial data are inherently graphical, we usually query them by using a **graphical query language**. Results of such queries are also displayed graphically, rather than in tables. The user can invoke various operations on the interface, such as choosing an area to be viewed

Vidyavardhini's College of Engineering and Technology  
Department of Computer Engineering  
Academic Year : 2022-23 (Odd Sem)

(e.g., by pointing and clicking on suburbs west of Manhattan), zooming in and out, choosing what to display on the basis of selection conditions (e.g., hotels with more than three stars), overlay of multiple maps (e.g., hotels with more than three stars overlaid on a map representing areas with low crime rates), and so on. The graphical interface constitutes the front end.

Extensions of SQL have been proposed to permit relational databases to store and retrieve spatial information efficiently, and also to allow queries to mix spatial and non spatial conditions. Extensions include allowing abstract data types, such as lines, polygons, and bit maps, and allowing spatial conditions, such as contains or overlaps.

Notice

Internal Assessment Monitoring Committeeing

To  
IAMC Members,

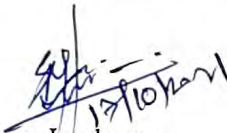

Respected sir/madam

**Internal Assessment I for SE sem-III and II for TE Sem-V, BE Sem-VII is scheduled on 18<sup>th</sup>, 20<sup>th</sup>, and 21<sup>th</sup> of October 2021.**

**The IAMC meeting to discuss the bloom levels of the question papers is scheduled on 14<sup>th</sup> October 2021 at 2.00pm.**

Internal Assessment Monitoring Committee.  
Academic Year - 2021-22 (ODD sem)

Minutes of Meeting

Date - 14/08/2021

Time :- 2.00pm

The meeting of IAMC for IA-I was held on 14/08/2021 at 2.00pm.

Following members were present in the meeting :-

Dr. Megha Trivedi - (HOD, Comp. Dept.)

Dr. Supna Borde - (Member) <sup>Borde</sup>

Ms. Anil Hingurise - (Member) - ~~\_\_\_\_\_~~

Ms. Sunil Kulkarni - (IA Exam Incharge) - ~~\_\_\_\_\_~~

Mr. Yogesh Pingale - (Member, IT Dept) - ~~\_\_\_\_\_~~

The points discuss in the meeting were as follows :-

- ① For the course DSGT, it was advised to reframe the questions as per bloom taxonomy.
- ② For the course TCS question 3' need to be framed according to Bloom level.
- ③ For the course MCC, it was advised to reframe question paper as per bloom taxonomy.

## Guidelines for conduction of IA2 for Even Sem AY 2022-23

1 message

hod\_comp &lt;hod\_comp@vcet.edu.in&gt;

Wed, Mar 29, 2023 at 7:07 PM

To: hod\_vcet &lt;hod@vcet.edu.in&gt;

Cc: "Dr. Harish Vankudre" &lt;principal@vcet.edu.in&gt;, dean\_academic\_vcet &lt;dean\_academic@vcet.edu.in&gt;, fe\_coordinator\_vcet &lt;fe\_coordinator@vcet.edu.in&gt;, lcexam\_vcet &lt;lcexam\_vcet@vcet.edu.in&gt;, smita jawale &lt;smita.jawale@vcet.edu.in&gt;

Dear Sir/Madam,

Following points were finalised in the meeting with Exam Coordinators of all Departments regarding IA2 ( 10,11,12 April 2023) held on 29/03/2023:

1. The time slots for IA would be as follows:

Morning: 9.30-10.30 am and 11.00 am -12.00 noon - SE, TE

Afternoon: 1.00 -2.00 pm and 2.30-3.30 pm -BE

**Supervisor should be allotted 2 consecutive duties. They are required to be in the classroom in the slots between 2 papers and invigilate, so that students do not scribble on the desks/benches/walls.**

2. BE papers would be held on 10th and 11th April 2023

3. For BE, 1st paper would be ILOC

4. For SE, 1st paper would be Maths

5. For TE, last paper would be Major/Minor course

6. DSE students will have IA 2 with regular students

7. Major/Minor course IA will be handled by respective Departments offering the Course

8. IAMC meetings have to be conducted before 5<sup>th</sup> April 2023.

9. Guidelines for paper setting : 5 Marks objective( no MCQ), 15 Marks Subjective

10. Classroom allocation for IA is as follows:

Comp; 517,519,520

CSEDS + Civil : 218,219,220,221

AIDS+Instrumentation: 515, 516

IT: 214,215,216

EXTC: 323, 424, 425

MECH: 313,314,315,320,321

10. Centralised Assessment will be conducted in Room No. 127 from 10-18 April (except Saturday/Sunday & holiday).

11. CAS duty chart is as follows:

10th -Mr. Sanjiv Vedpathak

11th- Mr. Rahul Patil

12th- Mrs. Madhu Lade

13th- Mrs. Komal Shringarpure

17th- Mr. Amol Chowdhari

18th- Mrs. Sujal Patil

thanks and regards

-
