Report of

Seminar on Discover the power within you 8th March 2023

(International Women's day)

Objective: To introduce the necessary skills, attitude and kind of behavior to become a successful entrepreneur.

About the Speaker: The guest speaker for the session

1. Mrs. Surekha Bhosale

A Visionary Entrepreneur, Career and Passion Counsellor, Trainer, Mentor, Influencer has built an ecosystem of Counselling - Learning - Skilling - Employing - Digital Branding and Mentoring with her own brand and two organizations Hrishi Computer Education and GlobereachIndia

Brief introduction of chief guest

A journey of Ambition, Determination, Dedication!! Training Centers are post-secondary schools in India. At Hrishi Computer Education we have trained 35000+ students in the last 17 years of journey. Today, being an ISO 9001:2008 certified and Government-recognized institute, Hrishi Computer Education is one of the TOP institutes at Mumbai North (Vasai, Virar, Palghar) for IT training and computer courses. Being accredited 12 times from various managements and also the most esteemed award "Best Vocational Training Provider" in 2019 for my renowned service in guidance and development.

The Journey as an Entrepreneur, Trainer, career Counsellor, and Mentor has led to cultivating the best educational practices for training institutes innovating different platforms for students and one of them recently is that we launched HrishiOnlineBuddhi is the No.1 Online-Learning Platform where students can learn the most demanding course in HINDI and ENGLISH considering the present situation and the demand for skill development in RURAL AREAS and students with LANGUAGE BARRIERS can upgrade their knowledge to achieve their dream career.

Entrepreneur Journey Continues Digital Transformation is a Mandate in today's world & the best digital services come with the big pack budget. I strongly believe that the power to transform for every entrepreneur is a must to accelerate business. On this premise, I Co-founded Globreach an Indian local custom software development company with one clear objective, to deliver the best customer service. Our mission is to develop enterprise applications, in India, that exceed the expectations of our clients while maintaining competitive pricing for both existing and small MSME start-ups looking for digital transformation.

Brief aspects of the event highlights:

Entrepreneurship's Most Important Facts

There are a few things you should know before starting a small or large business.

As a first-time entrepreneur, here are five things you should be aware of:

- There will always be dangers.
- The income is not consistent.
- It is necessary to market constantly.
- You'll require certain abilities.
- Entrepreneurship isn't a sure thing.

There are also recommendations from #investors, #entrepreneurs, and #financialexperts to assist you face and overcome the majority of the problems you'll experience when starting a business from the ground up. Years of experience as risk-takers have led to these conclusions. So, take your time, read, and think about the following suggestions.

Take chances: Some hazards are quite frightening and might result in significant losses. However, if you want to be a great entrepreneur, you must be willing to take chances. There are some calculated risks that you should accept in your business operations. You can imagine how happy you'll be if a risk you took paid off handsomely for your company.

As thoughts come to you, jot them down: You never know which of your many ideas will propel your company to the top. This is why you should write them down as they occur; ideas, like #opportunities, come and go.

All directions are connected: Networking will allow you to broaden your network and learn from people who have achieved the goals you seek. However, networking in all directions has a lot more advantages. Horizontal networking among other business owners might help you create social connections and learn from one another. Vertical networking allows you to learn from specialists, you will have more #knowledge or #skill than at least one individual.

Keep track of your spending: You may be so invested in the #success of your new business that you wind up overspending and accumulating debt. Make a list of important products that will help your company expand, and set aside some money to purchase them. Make a reasonable budget, stick to it, and adjust it as needed.

Make a strategy for getting out of the situation: You should know when to stop, halt, or push harder as an #entrepreneur. It's not a good idea to let your pride pull you down. If your project fails to progress, consider the mistakes you made. You might find that it wasn't a mistake at all; it was simply a scenario beyond your control. You can always go forward after learning from your mistakes.

Things may not go as smoothly as you hope if you are a first-time entrepreneur. It's not easy for #successfulentrepreneurs, either. However, by following these suggestions, you might find the #motivation to work hard and intelligently. Putting these suggestions into action will increase your startup's chances of success as it grows. So, I hope you'll internalise and act on them. If you enjoyed reading the article, hit that heart button below and share your views.

The felicitation will take place with a memento to Mrs. Surekha Bhosale by Dr. Harish Vankudre, Principal VCET. Total 42 students and 6 faculty members were attended the session.

The vote of thanks was delivered by Ms. Harshi Shah

Thank you

Dr. Ashish Chaudhari
