9.1 INTRODUCTION TO CYBER SECURITY

The last three decades have seen a massive increase in Internet activities. The term *cyber space* is commonly used to indicate these Internet activities. In today's world, almost everyone is connected to cyber space in one way or another, from surfing to gaming, from schooling to household activities, from banking to business; the uses are endless. This increasing number of cyber space users poses security issues for information stored on computers or data flowing through the network. The terms *cyber crime*, *computer crime*, *Internet crime* and so on are often used to indicate illegal activities that target the security of computer system(s) and data. These cybercrimes include spamming, spoofing, data manipulation, hacking, spying, password
