TECHNICAL PROGRAM COMMITTEE

卷之三

- | | |
|--|--------------------------------------|
| Dr. Nikhil Gupta, New York University, USA. | Dr. Shailesh Kundalwal, IIT, Indore. |
| Dr. Sri Bandyopadhyay, UNSW, Australia. | Dr. Ganesh Tamadapu, IIT, Chennai. |
| Dr. Marcin Sroda, AGH University of Science and Technology, Poland | Dr. Mursheed Imam, IIT Patna |
| Dr. P Venkateswara Rao, UWI, West Indies. | Dr. Kanmani Subbu, IIT Palakkad. |
| Dr. Aneta Krzyzak, MUA, Poland | Dr. Azeem P NIT Warangal |
| Dr. Prabhakar R M, Univ. of Mississippi, USA | Dr. Syam Prasad, NIT Warangal |
| Dr. Manoj Gupta, NUS, Singapore. | Dr. Benerji babu, NIT Warangal |
| Dr. S P Singh, IIT Delhi | Dr. Vinay Kumar, NIT Warangal |
| Dr. D. K. D. Inderdeep Singh, IIT Roorkee | Dr. R Suresh Kumar, NIT Raipur. |
| Dr. S. K. Acharya, NIT Rourkela | Dr. S.K. PAL, NIT Rourkela. |
| Dr. R. K Pandey, IIT Delhi. | Dr. B B V L Deepak, NIT, Rourkela. |
| Dr. A. S Sekhar, Director, IIT Palakkad. | Dr. G Srinivas, NIT Raipur |
| Dr. Mihir Sarangi, IIT, Kharagpur. | Dr. M. Heeralal, NIT, Warangal |

CORE COMMITTEE

Dr. C. Surya Prakasa Rao (Professor (HAG))
Dr. S. Srinivasa Rao (Professor (HAG))
Dr. P. Bangaru Babu (Professor (HAG))
Dr. A. Venu Gopal (Professor (HAG))
Dr. N. Selvaraj (Professor (HAG))
Dr. P. Ravi Kumar (Professor (HAG))
Dr. G. Amba Prasada Rao (Professor (HAG))
Dr. L. Krishnanand (Professor (HAG))
Dt. K. V. Sai Sriinadh (Professor)
Dt. R. Narasimha Rao (Professor)
Dt. A. Kumar (Professor)
Dr. A. Veeresh Babu (Professor)
Dr. Ch. Venkateswara Rao (Professor)
Dr. K. J. Davidon (Professor)
Dr. C. S. Chandra Bose(Professor)
Dr. B. S. Srinivasulu (Professor)
Dr. P. Vamsi Krishna (Professor)
Dr. K. Kiran Kumar (Professor)
Dr. V. Rajesh Khana Raju (Professor)
Dr. Srikanth Korla (Professor)

Dr. V. Hari Kumar (Professor)
Dr. D. Jaya Krishna (Professor)
Dr. V.P. Chandra Mohan (Professor)
Sri I. Ashok Kumar Reddy

Sri. G.R.K. Gupta
Dr. T. Sadashiva Rao
Dr. Karthik Balasubramanian
Dr. P. Ravi Kumar

Dr. P. Suresh
Dr. M. Bhargava
Dr. Ch. Harikrishna
Dr. Anant Kumar Rai

Dr. Shivaraman
Dr. M. Manjiah
Dr. Satyanand Abraham

Dr. Prasanth Anand Kumar Lam
Dr. P. Ramesh Babu

Dr. Gaurav Kumar Sharma
Dr. T. Gangadharendra
Dr. N. Srinagalakshmi

1st International Conference on Mechanical Engineering: Researches and Evolutionary Challenges (Hybrid Mode Conference)

on 23 - 25 JUNE 2023 at NIT Warangal

卷之三

Organized by:
Department of Mechanical Engineering
National Institute of Technology
Varanasi | Telangana | India

Organized by:

Department of Mechanical Engineering
National Institute of Technology
Warangal, Telangana, India

Patron	: Prof. N.V. Ramana Rao, Director, NIT Warangal
Chairman	: Prof. V. Suresh Babu, NITW
Convenor	: Prof. K. Madhu Murthy, NITW
Secretary	: Dr. G. Raghavendra, NITW.

Joint Secretary: Dr.CH. Sampath Kumar, NITW,
Dr. G. Venkatesh, NITW,
Dr. T. Selvan, NITW

PERFORMANCE ANALYSIS OF AIR CONDITIONING SYSTEM UTILIZING CONDENSATE

Kamlesh Bachkar^{1*}, Bhumiit Sunkhe¹, Omkar Kadamb¹, Sangharaj Kharat¹, Shree Shah¹
¹Vidyavardhini's College of Engineering & Technology, Vasai, Maharashtra, 401202.

ABSTRACT

There is higher requirement of Air conditioning systems due to increase in population and Industrialization throughout the globe especially in hot and humid conditions. The largest share of Energy requirement is due to Air conditioning system in the building sector. This paper is presenting a theoretical study about performance analysis of Air Conditioning systems utilizing condensate. For analysis purposes an IOT system is designed to fetch the data at key nodes of a Vapour Compression Refrigeration System (VCRS) cycle using Arduino IDE. It is observed that using condensate results in the desuperheating of the refrigerant while during entry of the condenser, which results in rise in condenser sub-cooling. As trade of getting increased in refrigerant effect and compression work, then in air conditioning system COP reaches maximum. Liquid specific heat & latent heat of vaporization, which are important thermodynamic parameters related with rise in refrigerant impact are important to calculate maximum COP with condenser sub cooling.

KEY WORDS: Vapour Compression Refrigeration system, Condensate, desuperheating, sub-cooling, IOT, Arduino IDE

1. INTRODUCTION

The project is about Performance Analysis of Air Conditioning system utilizing condensate. Condensate refers to the moisture that is extracted from the air when it is cooled and dehumidified by the air conditioning system. For air cooled condenser the ambient air during hot and humid condition are quite high, which affects the sub-cooling of the VCRs cycle. The condensate is being used to desuperheat the high temperature, high pressure refrigerant at the outlet of the compressor followed by air cooling in order to achieve additional sub-cooling of the refrigerant in the system.

The exchange between growing refrigerating impact and particular compression effort causes the Coefficient of Performance to achieve a maximum when condenser sub cooling increases. The greatest COP improvement with condenser sub cooling is determined by the thermodynamic parameters linked to the rise in the refrigerating impact, like liquid specific heat & latent heat of vaporisation [1]. The condensed liquid refrigerant after passing through an expansion valve experiences a sudden pressure decrease while still being in the thermodynamic condition known as a saturated liquid. The pressure decrease causes a part of the liquid to evaporate in an adiabatic flash [2]. Subcooling liquid refrigerant after it exits a condenser with refrigerant from the evaporator exit, apparently in the mode of saturated vapour, is a typical approach to increase COP [3]. The real time monitoring method for installing HVAC systems
