Green Campus Policy

List of Contents

- Introduction
- Vision and Mission
- Objectives
- Scope
- Responsibility and Accountability
- Green Campus Initiatives
- Monitoring and Reporting
- Compliance and Enforcement
- Conclusion

- **Introduction**

Vidyavardhini College of Engineering and Technology (VCET), Vasai recognizes its responsibility to create and maintain an environmentally sustainable and responsible campus. This Green Campus Policy Document outlines our commitment to adopting and implementing environmentally friendly practices and principles throughout the institution.

- **Vision and Mission**

Vision

VCET aims to become a leader in sustainable and environmentally responsible education, fostering an eco-conscious community and contributing to a greener future.

Mission

VCET is committed to creating a green campus by adopting sustainable practices, reducing our environmental footprint, and inspiring students, staff, and the community to embrace eco-friendly values.

- **Objectives**

- ✓ Reduce energy and resource consumption.
- ✓ Minimize waste generation and promote recycling.
- ✓ Encourage the use of renewable energy sources.
- ✓ Foster a culture of sustainability.
- ✓ Promote environmental education and research.

VIDYAVARDHINI'S COLLEGE OF ENGINEERING & TECHNOLOGY

Tel.: 0250-2338234 (6 Line) • Email : vcet_inbox@vcet.edu.in • Website : www.vcet.edu.in

- **Scope**

This policy applies to all aspects of VCET operations, including academic, administrative, and support activities.

- **Responsibility and Accountability**

a. Green Campus Committee

VCET will establish a Green Campus Committee responsible for the planning, implementation, and monitoring of green initiatives. The committee will consist of faculty, staff, and student representatives.

b. All Stakeholders

Every member of the VCET community, including students, faculty, staff, and visitors, is responsible for adhering to the green campus principles and taking actions to support sustainability.

- **Green Campus Initiatives**

VCET will implement the following initiatives to create a sustainable and eco-friendly campus:

a. Energy Efficiency

- ✓ Regular energy audits to identify and address inefficiencies.
- ✓ Installation of energy-efficient lighting and HVAC systems.
- ✓ Encouragement of responsible energy consumption.

b. Water Conservation

- ✓ Efficient water management practices.
- ✓ Promotion of rainwater harvesting and use of recycled water.

c. Waste Management

- ✓ Implement a waste segregation and recycling program.
- ✓ Reduce single-use plastics on campus.
- ✓ Promote composting and responsible waste disposal.

d. Sustainable Transportation

- ✓ Encourage the use of public transportation, cycling, and carpooling.
- ✓ Install bicycle racks and electric vehicle charging stations.

Tel.: 0250-2338234 (6 Line) • Email : vcet_inbox@vcet.edu.in • Website : www.vcet.edu.in

e. Green Spaces

- ✓ Maintain and expand green areas on campus.
- ✓ Promote biodiversity and native plant species.
- ✓ Limit the use of chemical pesticides and fertilizers.

f. Renewable Energy

- ✓ Explore opportunities for on-site renewable energy generation.
- ✓ Support and promote the use of solar power and other renewable sources.

g. Environmental Education

- ✓ Integrate environmental education into the curriculum.
- ✓ Organize seminars, workshops, and events related to sustainability.

• Monitoring and Reporting

VCET will regularly monitor and assess the progress of its green campus initiatives. Reports will be prepared and made available to the campus community and stakeholders annually.

• Compliance and Enforcement

Non-compliance with this Green Campus Policy may result in appropriate disciplinary actions, as per the existing institutional guidelines. All stakeholders are expected to comply with and support the implementation of green initiatives.

• Conclusion

VCET is committed to creating a sustainable, eco-friendly, and environmentally responsible campus. This Green Campus Policy Document outlines our commitment to embracing and implementing green initiatives and encouraging the VCET community to take part in building a greener future.

This document is a living framework, subject to regular review and adaptation as our green initiatives evolve to meet the needs of the environment and our community.

Academic Year 2022-23

Guest Lecture by Mrs. Rashmi Joshi on Energy and Environment
14th December 2022

Venue: Ground Floor Seminar Hall (3pm to 5pm)

About the Guest:

Name: Ms. Rashmi Joshi

Designation: Environment Consultant

No. of Participants: 21

Phone no. 9819599851

Mail id rashmijoshi72@rediffmail.com

Currently working as Environment Consultant for last 10 years with a special focus on Composting,

E-waste Collection Drives, Seed ball making and Kitchen Gardening

Educational Qualifications

M.A. (Greek Philosophy), NET Exam Qualified

Experience

- Lecturer at Ruparel Junior College, Khalsa Degree college, Government Law College and Mumbai University
- Public awareness related to environment issues-
- Creating awareness among students in particular and society in general by delivering lectures, guidance, training and implementation of composting projects at around 50 plus schools, colleges and 100 plus housing societies.
- E-waste collection, plastic waste collection and sending it for recycling – from approximately 50 colleges of Mumbai, Navi Mumbai, Thane, Pen (Raigad) & Ratnagiri; 200 plus housing societies and 25 Schools and other institutions including the corporates.
- Organisation of E-waste collection drives in 40 colleges, 25 schools and 50 residential colonies of Mumbai, Dombivali, Thane & Navi Mumbai and collected around & 20 ton of E-waste and its disposal for scientific recycling to Government approved recycler. This way the E-waste reached the recycling facility instead of reaching the dumping ground.
- Similarly, composting projects were completed at several locations and few hundred tons of wet waste in the form of kitchen waste and garden waste was prevented from reaching the dumping ground.
- Conducted around 2000 plus awareness lectures on Solid Waste Management in various Educational Institutions, Housing Societies & other Institutions.
- I was also involved in organization of Plastic Waste Collection Drives in various educational and other institutions.
- Conducted webinars in around 100 institutions during lockdown till date. Awareness interviews on All India Radio as well as Media Coverage in various Newspapers.

Awards and Achievement

- Felicitated by Thane Municipal Corporation
- Felicitation by F/North Ward of MCGM.
- Naari Swashakti Puraskaar.
- Guru Nanak College Award
- Prasar Bharati Award for work in Swachh Bharat Abhiyan
- Kartrutvavaan Naairatna Gaurav Puraskar 2020
- Corona Warrior Awards (from 4 Organizations)
- Rajyastariy Covid Yodhha Samaj Rakshak Mahasanman 2021
- Adarsh Corona Warrior Award received on 1st May 2021.
- Served a critical cancer patient continuously for two years.

Vidyavardhini's College of Engineering & Technology Academic Year 2022-23

Mrs. Rashmi Joshi addressed about the scientific findings that a global energy transformation is needed to address the growing risks associated with accelerated global environmental change. Anthropogenic pressures on the planet have reached a level where large-scale deleterious impacts, or even catastrophic ones, can no longer be excluded. She also mentioned that such impacts have the potential to undermine human development.

This new global social environmental predicament is closely associated with energy. Atmospheric emissions from energy use contribute to multiple environmental impacts. In addition to climate change, atmospheric pollutants may limit net primary productivity of ecosystems, and lead to the acidification and eutrophication of land and seascapes. Energy and Environment

interact, reinforcing impacts on social and environmental systems, in complex ways that are not always well understood. She talked about Climate change and GHG emissions.

Students asked about how they can contribute to reducing the impact of Global Climate change to which she replied to follow the SDG's which can cause a greater impact on the sustainability index of the country.

The session ended with a vote of thanks by Mr. Vishwas Palve, Assistant Professor at the Department of the Mechanical Engineering.

Outreach Activity at various schools for awareness about Energy Conservation
16th December 2022

Venue: St. Annes High School, Podar International School, Issac Newton High School, New English School and Taramai Vartak Memorial School

Aim: To create awareness among the citizens towards Energy Conservation and Efficiency

With an aim to create awareness among the citizen of Vasai Virar Municipal region, Department of Mechanical Engineering on the National Energy Conservation Day proposed an outreach activity under the name "Urja Vistaar".

Objectives Of Urja Vistaar

The objective of **URJA VISTAAR** is to create awareness among the public and equip them for efficient management of all forms of energy, to promote energy efficiency and energy conservation and to develop new sources of energy as well as novel energy technologies with a view to increasing the production and facilitating the use of energy on a sustainable basis. It aims at seeking the school children of Class 9th and 10th to convene, catalyze and facilitate works in the energy conservation related activities in a participatory mode by utilising the natural sources of Energy. Therefore, schools that have been involved in community participation, environment, and energy conservation work were approached for promoting the sustainable usage of Energy for Cooking, Transportation and Lighting.

Activities

This program, in general, focuses on enhancing environmental awareness and fostering critical thinking and problem- solving approaches among participants, by helping them to become actively involved in the exploration of their immediate environment through understanding certain concepts and undertaking some selected activities related to Energy conservation and energy efficiency. The intention is to encourage an approach which takes some of these basic ideas and adapts them to suit local needs. Thus, the activities of the Urja Vistaar program consist of demonstration of Solar Cooker so that the basic needs of cooking can be established by the participants. Also the program involves to demonstrate and distribute solar Lamps to students living in tribal areas who are deprived of uninterrupted power supply which hinders there need for studying during the off sunlight periods.

Action:

The faculties of the Department of Mechanical Engineering visited the schools in the Vasai-Virar Municipal Corporation region to sensitize the students and inculcate mitigation from conventional methods of energy usage. The snaps of the visit are as follows:

Report of Expert Talk on Process of Innovation Development Technology Readiness Level(TRL), Commercialization of Lab Technologies and Tech-Transfer 19th Dec 2022

Objective: The process of Innovation Development in Solar Energy Conservation and Start up Strategy

About the Speaker: The guest speaker for the session

1. Speaker:- Mr.Ratnesh Shingrupe

Founder- and CEO of Quasar Innovative Solutions – India (Qinso),Thane Maharashtra

Brief introduction

Quasar Innovative Solutions – India have received four national awards in System Designing in Renewable Technology. Years of R & D in Industry has gained confidence to attempt for extremely difficult levels of Projects Implementation. Challenges inspires Quasar Innovative Solutions – India to work & resolve them with best possible solutions. Environment & Innovative research are the fields which inspires them to work passionately for betterment of the society. We wish for the better business relations in coming time.

Mr.Ratnesh graduated in Computer Science from Mumbai University established his own start up by this venture. Mr.Ratnesh is a motivational speaker for the students since long time and today he is presenting about the innovation development technologies ,TRL and ways of commercialization

Brief discussion of the event

Mr.Ratnesh is very close to solar energy work and established his own Quasar Innovative Solutions – India (Qinso) for manufacturing of solar panels. Mr.Ratnesh is actively involved in the solar photovoltaic plant installation and commissioning.

Brief Description of the event

Mr. Ratnesh elaborate about the clear goals and vision. In view of Mr.Ratnesh, the vision should be created keeping long term goals. This vision only powers the enterprise to travel on the path of growth. This vision set by the founder of entrepreneur should be the vision of all employee working in the enterprise. Its not only to earn higher salary or higher position in the company.

The broad vision may have small small goals in order to fulfill the vision. Time to time after reaching to set targets, the vision of the company could be improvised.

Prave

Allesh

AS
HEAD
Dept. of Mechanical Engg.
Vidyavardhini's College of
Engineering & Technology
Vasai Road-401202.

Mr.Ratnesh highlight of getting inspired by the vision. All employees together will prepare the action plan the vision. If all focused on vision then the small goals are automatically fulfilled.

Mr. Ratnesh emphasis that see the dreams when you are awake not when you are sleeping. Those you can follow and put forward steps towards fulfillment of them.

Mr.Ratnesh established his own competence keep consistency in the technology readiness level with respect to market. Mr.Ratnesh explained about the TRLs for establishing an enterprise rather who could mae his/her way towards enterprises based on TRL, MRL. The review of market should be very important and one should keep the plan in hand to execute the technology on time.

Be diligent and and inspired for technology transfer with industries ,research labs for prograss of the product in term consumer market gain.

Overall the session was excellent and may videos shared by Mr.Ratnesh during installation of the solar plants by their venture. The mathematics of calculating the project cost and quoting also discussed in details. Students were actively participated in the Q and A session. Total 52 students and 4 faculty members were participated in the event.

Thank you

Report of Expert Talk on Energy Conservation Strategy in Electric Vehicles 14th Dec 2022

Objective: To create awareness for innovations in energy conservation strategies needed in electric vehicles

About the Speaker: The guest speaker for the session

1. Speaker:- Mr.Kavan Raval

Chief Strategic Sales and Partnership Officer, Earth Energy EV, Vasai

Brief introduction

Mr. Kavan is A Techno-Commercial expert in the field of EV Automobiles with a proven record in sales, operations, and corporate relations. Been part of an electrified journey where Mr. Raval saw a company & product in making from scratch and contributed to solidifying the roots of the same. Always ready to take up the driving seat of prototypes, push the machine to its limits, present the inputs to R and D team. Mr.Raval undertook vehicle development & logistical operations, event management, company representation activities at seminars and conferences.

Beyond vehicle technology, a significant boost in EV adoption could be awareness programs for users and technicians. Mr.Raval and team create a pool of EV promoters by organizing seminars/workshops for potential users and mechanics. There are many misconceptions about EVs that need to be addressed, which can be clarified by continuous interactions as a community. EV charging infra-availability is also an important game changer.

Brief Summary of the talk

Mr. Raval started his session with the introduction of his company Earth Energy EV and the startup growth and present status in field of electric vehicles. Mr.Raval highlights upon the key factors during design and development of the electric vehicle is the weight of the vehicle and the battery usage for maximum milage.

To understand this , the weight of the electric vehicle could be kept low using the innovative materials without compromise of the safety and anti-collision test. Various materials are under research and utilized in the making of electric vehicles. The weight of vehicle could be substantially reduced using the composite materials maintaining the same strength.

The lower the weight higher will be the performance of the vehicle. Further the battery system of the electric vehicle is another important part for the best efficiency of the vehicle. The battery system is such

M. Kavan

HEAD
Dept. of Mechanical Engg.
Vidyavardhini's College of
Engineering & Technology
Vasai Road-401202.

that it should be light in weight. Different orientations of the cell and frame design is crucial in the development of battery system of the electric vehicle.

The cooling system of the battery affects the performance in electric vehicle. In two-wheel vehicles, air cooling or natural draft cooling only possible, however in four wheel vehicle the cooling system need to be designed which could keep the cell temperature below designed limit of 40-45 degree centigrade. For this liquid coolant flow around cell is important. The maximum heat generated in the cell in axial direction which need to be dissipated to the surrounding, for this Mr.Kaval demonstrated different designs which are in exist and also under research. Mr. Kaval emphasis scope for innovation and research in this field of battery management system.

Optimum design of Battery system will automatically improve the performance of the vehicle. Battery swapping method which is a new technology initiated by the different start ups in India. Government of India is promoting the young engineers to establish their start up in this sector. Mr.Kaval gives the detailed explanation of the Battery Swapping technology.

Further Mr. Kaval put forward a question whether the electric vehicle causes pollution/emission. Mr. Kaval explains the clean environment or zero carbon footprint policy of Government of India. Electric vehicles consume electricity for charging. This electricity if generated from renewable sources such as solar photovoltaic or wind turbine farm could make a difference.

Overall the program was full of research and innovation. Students interacted with Mr.Raval with lots of question for this very new and silent technology of Electric Vehicles,

Around 50 students and 4 faculty members attended the event.

Report of National Energy Conservation Week 16th Dec.2022

Objective: To inculcate the importance of energy and its consumption among society

About the Speaker: The guest speaker for the session

1. Dr. Megha Trivedi
Associate Professor, Computer Engineering Department
2. Mr. Swapnil Mane,
Energy Auditor, Mechanical Engineering Department
3. Mr. Vishwas Palve
Energy Manager, Mechanical Engineering Department

Brief introduction of Event

Institute Innovation Council in association with IQAC Vidyavardhini's College of Engineering and Technology organizes a Bicycle Rally with banners for awareness about energy saving and methods to generate energy from renewable sources for Ingrid power generation.

Dr.Trivedi and Mr. Swapnil Mane along with students were designed the banners for energy conservation and manufacture the hoardings that could be fixed to the bicycle. The banners of size 60 cm by 30 cm and wooden frame with handle for fixing it to the handle bar of the bicycle.

All participants arranged bicycles from thir own or from friends or relatives and participated in the event. The bicycle rally was started from institute campus at 10.30 am. Dr.Megha Trivedi shows the flag for starting the rally.

Starting from institute the participant follows the track to Ganapati mandir- panchavati- 100 feet road- suncity-grass road- bhuigaon. Return along the same track. Total travel of the bicycle rally is 15 kms.

The banners are

- a. National Energy Conservation Week
- b. Clean Energy renewable fuels
- c. Energy is Life save it
- d. BIS standards for energy saving
- e. Solar panel grid power generation
- f. Saving Energy methods

2) Use of IOT (AI and ML) for Energy Data. Going beyond EMS with Plant connect. The guest explained about how Internet of Things and concepts of AI and ML can help data managers acquire useful information with Energy Management system.

3) Digital Utilities

Using continuous data obtained from IoT and from Big Data provide inputs for optimizing energy, water and asset performance from energy signature of machines and systems at part loads (Continuous re-commissioning)

This uses the dynamic modelling of fluid (Liquids/Gases) systems from energy, and derive fluid and thermal energy flows and efficiencies

So data of parameters like Energy, Power, Electrical, Temp, Pressure, RH, vibration provide useful insights for altering the operating machines at part loads for maximizing their energy performance.

Feedback Feedback and constructive comments were given by students and the events was successfully organized with certificates being presented to successful students.

The screenshot shows a Google Meet interface. The main window displays a presentation slide titled "What is IoT/IIoT/Industry 4.0". The slide content includes:

- Industry 4.0 :** Today's Era of Connected world through connected devices from mobile/tablet/computers/watches/AR/VR to machines and automobiles through telemetry using mobile technologies & internet
- Gateways/Converters:** A device which aggregates the data from devices like various sensors/PLCs/SCADA/DCS/HMIs/Relays etc electronically using wired or wireless technologies and sends it to the local server or cloud server on which some software is installed to process this data and provide UI , statistics and analytics and offer reports, intelligence, and alerts etc
- Wireless technologies:** GPRS / Bluetooth, Wi-Fi, Lora etc
- Protocol:** Modbus, Profibus, HART etc
- Sensors:** A physical device which senses the data as parameter and displays and or transmits this data
- IoT- Internet of things**
- IIoT-Industrial Internet of Things**
- Cloud Server:** Amazon, Alibaba, Private Clouds
- Local Server :** Local high grade computer (On Premise)

The slide also features a logo for "PlantConnect" and a small diagram of a factory. The Meet interface shows a grid of participants, including Dr. Harish Vankudre, Vartak Manal Ajit, shaista khan, viren.180622101 vcet, Apurva Pendhaje, and 6 others. The bottom of the screen shows the Windows taskbar with the time 10:32 AM on 14/12/2021.

2) **Mr. Swapnil Mane:** Solar Energy for Sustainable Lifestyle. How to install solar system for a residential purpose. He explained that as a renewable source of power, solar energy has an important role in reducing greenhouse gas emissions and mitigating climate change, which is critical to protecting humans, wildlife, and ecosystems. Solar energy can also improve air quality and reduce water use from energy production.

3) **Mr. Dipak Choudhari:** Indian rapid urbanization is creating an unprecedented demand for buildings, which already account for nearly 35 percent of India's total electricity consumption. The guest explained that energy efficiency is one of the world's largest energy resources and we are just beginning to tap its potential. India is at a unique crossroads where two-thirds of the commercial and high-rise residential structures that will exist in 2030 are yet to be built. Thus, implementing energy efficiency in buildings that will be constructed in the next decade offers an opportunity to significantly reduce the energy use and imparts cost savings for the next generation.

4) **Bicycle Rally:**

The initiative was to spread awareness against the depletion of non-renewable resources and to save energy. They spread messages such as, saving energy means decreasing the amount of energy used while achieving a similar outcome of end use, using less energy has lots of

Academic Year 2019-20

of energy used while achieving a similar outcome of end use, using less energy has lots of benefits – you can save money and help the environment, generating energy requires precious natural resources, for instance coal, oil or gas. Therefore, using less energy helps us to preserve these resources and make them last longer in the future, instead of driving to work or school, take the bus, carpool, walk, or ride your bike to cut down on greenhouse gas emissions. Consider investing in appropriate technology like clean power (solar or wind), if not for your home maybe for a community centre.

Feedback

Energy Conservation Week 2018

Introduction

World Energy Conservation Day is celebrated on 14th December globally to highlight the importance of energy consumption and its use in our day-to-day life.

It is a day for building up awareness regarding need for energy conservation, Energy efficiency and carefulness in energy use.

The Program

OBJECTIVE: TO CREATE AWARENESS AMONG CITIZENS ABOUT THE CONSERVATION OF ENERGY.

ACTIVITY:

Around 100 Faculty members will participate in the awareness program who will create awareness about Energy Conservation in their locality. Approximately 15 faculties from Mechanical Department will address 25 Societies to follow ENCON measures.

5 Faculties from PAT will decipher the best practices followed for Energy Conservation to approx 10 designated consumers (Utilities/Industries).

PROCEDURE:

Explain the need for Energy Conservation.

Explain how Electricity flows from Power plant to household. [1 Unit saved = 2 Units Produced]

Take a note of various equipment in the house such as Lights, Fans, AC, Refrigerators, Water Heaters, etc.

Give Energy Conservation opportunities. (Conveyed during Lecture session)

Discuss various policies framed by government towards energy utilization and development.

Take Feedback.

CONCLUSION:

At the end of the week (21st December 2018) we will analyse the usage pattern of household and understand the practices followed by these households. Comment on general suggestions made by the participants of this campaign.

Institutional Values and Social Responsibilities

7.1.2

**Circulars and Report of activities for the
Implementation of the initiatives document for**

**Management of the various types of
degradable and non-degradable waste**

Our Institute manage the following types of degradable and non-degradable waste.

- Solid waste management
- Liquid waste management
- E-waste management

Solid waste management:

The Institute strongly promotes the principles of 3 R's i.e. Reduce, Reuse and Recycle and take all possible initiatives to inculcate the same among students and staff to minimize waste generation. Being an Educational Institute, hazardous waste or e-waste is not significantly generated. Adequate measures are in place to manage the solid waste. Dead leaves from the trees and a reasonably large amount of other solid waste generated in the college is managed thoughtfully. The green waste is collected centrally in the pit and used up in the composting of the campus. The output of this is used as manure for the plants in the gardens. Paper waste including shredded answer sheets are sold to licensed purchasers.

Liquid waste management:

Being a Technical Institute, hazardous waste from chemicals and acids are minimal in the Chemistry laboratory. However, utmost care is ensured to dilute the concentrated solutions before their disposal.

Appropriate measures are taken to dispose of the toxic wastes.

E-waste management:

E-waste such as computers, printers, CPUs, UPS batteries, electrical and electronic assemblies, cathode ray tubes, PCBs, resistors, capacitors etc. collected from various departments are sorted and are either disposed in safe manner through the authorized vendor or exchanged during the new purchase. Almost all equipment is used to its fullest, by permitting usage of its parts in other suitable equipment or in student's projects.

Liquid Waste Management of Chemistry Laboratory, VCET

Radioactive and hazardous chemical waste are not produced by the Institute. For laboratory or research purposes, the majority of departments do not employ any chemicals or radioactive materials.

Chemicals are handled in extremely small quantities and are employed in diluted form in the Chemistry laboratory activities. All students receive guidance from staff members on how to use and handle chemicals safely.

The bulk of the tests employed alkali and acid solutions, which are created in extremely low quantities and are not highly dangerous. The primary purpose of acid-base titrations is to determine the concentration of the reactant or product. As a result, the reaction mixture and neutral wastewater comprise the laboratory's output. Samples of the titration and reaction mixture are collected separately and placed in waste chemical containers. After neutralization and dilution, it is released further.

Mrs. Chandrakishori Sonarkar
Chemistry Laboratory Incharge

Institutional Values and Social Responsibilities

7.1.2

**Circulars and Report of activities for the
Implementation of the initiatives document for**

Water Conservation

Water conservation facilities available in the Institution:

1. Rain water harvesting
2. Construction of tanks and bunds

Rooftop rainwater harvesting

A roof top rainwater harvesting structure is created within the institute campus to reduce ground water withdrawal and to recharge ground water.

Construction of tanks & bunds

A ferrocement tank of size 3 ft x 3 ft and depth 2 ft was constructed in the campus in association with Jalvardhini Pratisthan. The tank is currently used as a curing tank in the building materials & concrete laboratory for civil practical sessions (Report available)

Rain water harvesting structures and utilization in the campus

Response:

The Institute aims to use natural resources such as sunlight, rain water to its best. The total drinking water requirement of the college is fulfilled by the Vasai Virar Municipal Corporation water supply scheme.

Other water requirement is met through the harvested rainwater. The Institute has invested Rs.1.1 Lacs for installing the rainwater harvesting system.

Rain water harvesting structure:

Rainwater from terrace area is collected using PVC pipes and diverted to the existing boring water tanks through advanced filters and recharge tanks. The pipes from terrace outlet are connected to an underground tank which stores water; this serves the purpose of recharging wells and bore wells. There are two different collection chambers. First collection chamber has a diameter 1.65 meter (Approx.) and 3.5 meter (Approx.) and second collection chamber is of diameter 0.95 meter (Approx.) and 3.5 meter (Approx.). During the collection of water to these chambers, 3 filter beds each measuring 0.8m × 1.8m × 2m (Approx.) are provided for the filtration of harvested water. Water collected from these two chambers is pumped to the overhead tank using a solar pump.

Utilization:

The harvested rainwater is used for water closet, gardening, washing and cleaning floors throughout the year.

RAINWATER HARVESTING SYSTEM COMPLETION CERTIFICATE

To,

Vidhya Vardhini's College of Eng. & Technology

9.4.2013

Vasai

Sub: Completion certificate of Rainwater Harvesting scheme at Engg. College Building No. A

Sir,

I hereby certify that the scheme of Rainwater Harvesting at Building No. A of engineering college on plot bearing S. No. 20, 21, 22 & 23 at village: Navghar, Tal: Vasai, Dist: Thane has been implemented as per the concept & design submitted by me as Rainwater Harvesting consultant. (Ref report RWH/VV/13/1, dated 25.3.2013). The work done at the above site fulfills the criteria as mentioned in directions given under TPB-432001/2133/CR-230/01/UD-11 dated 10.3.2005 & in the notification No. TPB-4307/396/CR-124/2007/UD-11 dated 6.6.2007 issued by Government of Maharashtra Urban Development & also, as per DCR of Vasai -Virar sub region of CIDCO.

The work was completed by April, 2013. Minor changes in the design were incorporated as per the prevailing site conditions. The work has been implemented under my supervision. The work has been completed to the best of my satisfaction.

Yours sincerely,

Dr. Amar N. Joshi.

9.4.2013

RAINWATER HARVESTING SYSTEM COMPLETION CERTIFICATE

To,

Vidhya Vardhini's College of Eng & Technology

Vasai

9.4.2013

Sub. Completion certificate of Rainwater Harvesting scheme at Engg. College Building No. A

Sir,

I hereby certify that the scheme of Rainwater Harvesting at Building No. A of engineering college on plot bearing S No. 20, 21, 22 & 23 at village Navghar, Tal Vasai, Dist Thane has been implemented as per the concept & design submitted by me as Rainwater Harvesting consultant. (Ref report RRAP/VA/V/13/1 dated 25.3.2013) The work done at the above site fulfills the criteria as mentioned in directions given under TPB-432001/2133/CR-230/01/UD-11 dated 10.3.2005 & in the notification No. TPB-4307/398/CR-124/2007/UD-11 dated 6.6.2007 issued by Government of Maharashtra Urban Development & also, as per DCR of Vasai-Virar sub region of CIDCO.

The work was completed by April, 2013. Minor changes in the design were incorporated as per the prevailing site conditions. The work has been implemented under my supervision. The work has been completed to the best of my satisfaction.

Yours sincerely,

Dr. Amar N. Joshi.

N.S.S. Committee (2022-23)

Date – 30th September, 2022

To,
The Principal
VCET

Subject: Report on “Save Water Poster Making” Competition.

NSS Committee of Vidyavardhini's College of Engineering and Technology held the "Save Water or Rainwater Harvesting Handmade Poster Making Competition" from 26th to 30th September 2022.

This competition welcomed college students from every department to create posters with a central theme of water conservation and rainwater harvesting. Participants were required to submit their posters in-person from 26th to 30th September. Winners of the competition were rewarded with cash prizes and certificates, which were presented by the Vasai Virar Municipal Corporation.

The competition achieved its core purpose of spreading awareness about rainwater harvesting among students, nurturing their creative talents, and inspiring them to support a noble cause.

Thank you.

Dr. Pradip Gulbhile
Program Officer
NSS

Institutional Values and Social Responsibilities

7.1.2

**Circulars and Report of activities for the
Implementation of the initiatives document for**

Green campus initiatives

The institutional initiatives for greening the campus are as follows:

1. Pedestrian Friendly pathways
2. Ban on use of Plastic
3. Landscaping with trees and plants

The Institute is located 3 minutes walking distance from Vasai Road suburban Station on Western Railways. Most of the students and staff members of the Institute stay in Western suburban area of greater Mumbai and the frequently used mode of transport in this area are Western Railway local suburban trains.

Ban on use of Plastic:

The Institute has taken initiative to spread the awareness of green living in the campus. Posters showing awareness about plastic free campus has been displayed in the campus so that each person in the campus could follow initiative.

Landscaping with trees and plants:

The Institute is blessed with green campus through the nature itself each block of the building and playground are surrounded by green lawn & trees, in addition to the Institute ensure to strictly adhere plantation activity regularly.

Subject: **Proposal for Establishing a Green Club in our College**

Respected Sir

I, the undersigned, Ms. Puja C. Kadam, Assistant Professor of Civil Engineering Department of our college is writing you this application, on behalf of Civil Engineering Department, to propose the establishment of a Green Club on our campus, dedicated to promoting environmental awareness, sustainability, and community engagement. In today's world, the importance of environmental consciousness cannot be overstated, and as members of the academic community, we have a responsibility to contribute positively to our planet.

The primary objective of the Green Club is to foster a culture of sustainability and eco-consciousness within the college community. We aim to educate, engage, and inspire students to adopt environmentally friendly practices and contribute to the global effort to address climate change.

I believe that establishing a Green Club in our college aligns with our institution's commitment to academic excellence, social responsibility, and sustainability. I am confident that this initiative will not only benefit our college community but also serve as a model for other institutions to follow.

Thank you for considering this proposal. I look forward to your positive response.

Sincerely,

Ms. Puja C. Kadam

Assistant Professor

GREEN CLUB OF VCET, VASAI

Need of Green Club:

Climate change is one of the critical challenges of the times we live in. Every component of the environment, including the water cycle, rising heat levels, biodiversity, and soil is affected by environmental degradation and these changes, in turn, impact our living, food, health, employment and almost every aspect of our life.

Hence, these changing times call for coordinated interventions to combat and face climate change. Young people are playing and going to play a crucial role in addressing climate change globally, nationally, and at their local level.

Maharashtra is the third most climate-vulnerable state in India after Assam and Andhra Pradesh. The state has nine agro-climatic zones, and the third-longest coastal belt in the country. It is the second most populous state with a significantly large population living in low-income settlements, and tribal pockets that are vulnerable to climate impacts. At the same time, many places in the state are exposed to recurrent hazards such as cyclones, landslides, floods, droughts, climate-induced disease spikes, and so on. Children, adolescents, and youth face a combination of exposure and a very high vulnerability to multiple hazards and environmental shocks due to inadequate or inaccessible and sometimes disruptive essential services especially related to water, sanitation, healthcare, and education. These challenges become even more threatening for children from vulnerable and disadvantaged backgrounds.

Maharashtra ranks 38 among the world's regions at-risk of damage to the built environment due to climate change, states a report published on February 23 according to the Gross Domestic Climate Risk Report which states that the more developed or 'built-up' a particular region is, the more vulnerable it will be to climate change-induced natural disasters by 2050. Mumbai's vulnerability assessment has predicted that the metropolitan city will face two major climate challenges - a rise in temperature and extreme rain events which can result in massive flooding. The six key action areas and strategies laid out to combat the effect are:

1. Urban Flooding & Water Resource Management
2. Sustainable Waste Management
3. Urban Greening & Biodiversity
4. Energy & Buildings
5. Air Quality and
6. Sustainable Mobility

Vidyavardhini's College of Engineering & Technology

Department of Civil Engineering

Tackling climate change requires concerted and coordinated government action as well as conscious and informed efforts by individuals. Therefore, it is essential to strengthen both formal and informal education on climate change and viable lifestyles. Green club aims at building the capacity of youth as future leaders and driving forces behind a new climate change regime, where college students can diversify their careers and abilities by learning new skills whilst tackling environmental and climate change issues.

Aim and Objectives of Green Club:

The Green Club (GC) is established to provide the values of environmental stewardship among the students. It aims to work towards an eco-friendly environment in and around colleges and education institutions by efficient use of resources like water, waste, energy, and circularity.

The formation of Green Clubs will primarily focus on coordinating with youth in the colleges to support environmental activities and projects within colleges and communities as extension services. Under this program, the aim is to empower students to participate in and take up meaningful environmental activities and projects. Green Club would be imbibed in college-level curricular activities to ensure effective implementation and act as a platform to develop sustainable lifestyles, knowledge, and leadership skills.

Formation of Green Club:

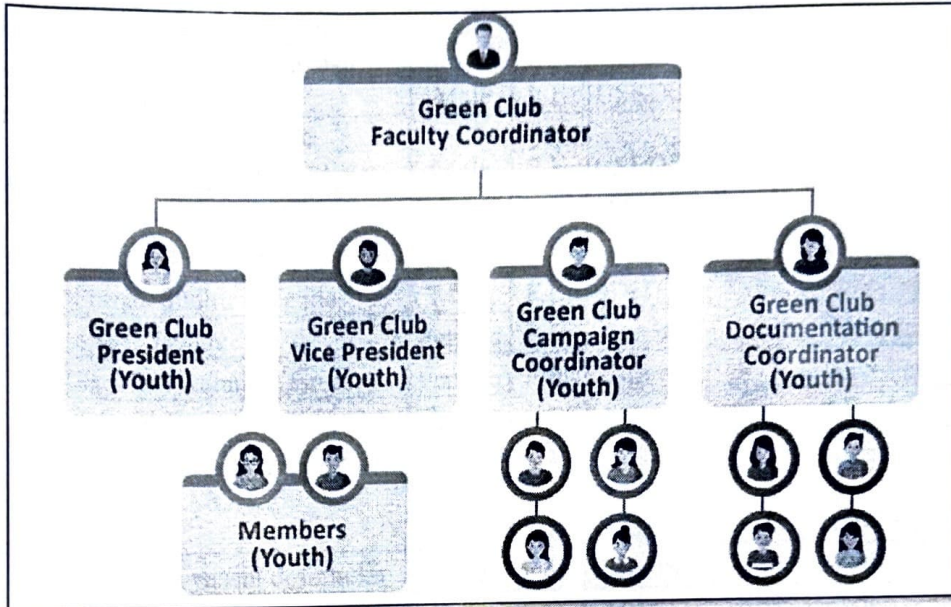

As stated in the objectives, the overall effort is to institutionalize the environment and climate change mitigation and adaptation activities in college. Any college student interested in and committed to addressing environmental issues and learning about climate adaptation solutions can become a member of the Club. The Club should ensure a balance of all genders and have maximum volunteers registered in the Club. The Club's membership will be for two years. The participation of members will be recognized at different stages by giving badges during this period and they will get a certificate for participation after the completion of two years.

One or two faculty members who have a long-term vision of climate change should lead Green Club activities. However, the vision should be shaped and articulated in coordination with all the student members. The Club will have meetings every week to discuss and take reviews of environmental sustainability and climate change adaptation activities. The activities aim to create climate change-sensitive youth and inculcate green habits through various innovative and classical methods.

52	SHRUTI GAUCHANDRA	Female	F.E.	AIDS	Member

Activities to be done under Green Club:

The following activities are planned for the implementation phase of Green Club.

Water conservation activities

- Avoid wastage - Fix leakages, fix flow of taps, be more conscious
- Take shorter showers
- Turn off the water while brushing your teeth
- Turn off the water while shaving
- Run washing machine only in full capacity/ full loads
- Access to individual soak pit
- Access to community soak pit

Waste Management activities

- Plastic waste collection drive and awareness on Single-Use Plastic ban.
- Plastic Free College campus, village
- Zero Waste College Campus Make your Institution a 'Zero Waste Institution'.
- Organic waste composting

Energy Conservation activities

- Analysis of Energy usage
- Awareness creation on efficient energy usage
- Share skilling and entrepreneurship opportunities in renewable energy sector.
- Organise discussion around means and ways to minimize emissions as a college/ institution and as individuals.

Biodiversity protection Activities

- Biodiversity register
- Tree census of College Campus, Village, Taluka
- Butterfly garden
- Adopt, plant, nurture a native tree.
- Promote tree plantation and biodiversity protection in their respective localities

Subject – Permission for organizing Expert session on Rainwater Harvesting

Respected Sir,

We, on behalf of Civil Engineering department of VidyaVardhini's college of Engineering, Vasai (W) and also a Green Club Faculty Coordinator(GCFC), hereby request you to grant a permission for organizing Expert session for Engineering students on **Rainwater Harvesting** on 08/09/2023, Friday from 11:00am - 1:00 pm by Mr. Sandeep Adhyapak, Chartered Engineer at Water Field Technologies, Pvt. Ltd. This session was previously organized on 20/07/2023 but due to heavy rainfall, holiday was declared by government and the session got postponed.

Water Field Technologies Pvt. Ltd is the key contributor towards the acquisition and high-level utilization of Water Resources. They deal with water harvesting in India and worldwide and they have Memorandum of Understanding (MOU) with our Civil Engineering Department

Also we request you to sanction the amount of Rs. 3000/- against honorarium and travelling expenses. We would be grateful if you permit us for the same.

Thanking You

Report of Expert session on Rainwater Harvesting- An effective tool for water management

Objective of the Session: To provide a platform for the dissemination of knowledge, discussion, and awareness-building regarding the importance and implementation of rainwater harvesting as a sustainable water management technique.

Date of Session: 08th September 2023, Friday at 11:00 AM

No. of Participants: 40

Name of the Speaker: Mr. Sandeep Adhyapak, Director of Water field Technologies Pvt. Ltd.

About the Speaker:

Mr. Sandeep Adhyapak is a bachelor's in civil Engineer from Mumbai University (1994). As a Rainwater Harvesting Expert / Consultant he has created various success stories with many Organizations/Govt. Departments and industries all over country. He advocates Rainwater Harvesting through his Company - Water Field Technologies Pvt. Ltd.-Mumbai, the Projects implementation for augmentation of Ground Water sources to meet the needs of Water supply in Industries, Urban Development projects and drinking Water supply schemes in rural area. He is Life member of Indian Waterworks Association (IWWA) Mumbai Centre. He has presented the case studies in a Workshop on Rainwater Harvesting under National Environmental Awareness Campaign 2003-2004 (Ministry of Environment & Forest) Organized by Govt. Polytechnic, Bombay. He was appointed by Thane Municipal Commissioner, as an empaneled consultant (2005), Expert on Rainwater Harvesting, for creating awareness in Thane city and in 2012 on Vasai-Virar City Municipal Corporation (VVCMC). He is Winner of Special Mention Prize in H2H-2005 Competition for Turnkey Project designed and implemented at Maharashtra Nature Park At Sion-A Rainwater Harvesting Project In Mumbai, Funded By MMRDA. He Also made other presentations and attended Exhibitions, Training programs, Lectures and Workshops Rainwater Harvesting, conducted by various organizations.

Vidyavardhini's College of Engineering & Technology

Department of Civil Engineering

Description of the Session:

Green Club of VCET in collaboration with Department of Civil Engineering had organized an Expert session on Rainwater Harvesting for all the Faculty members and students. The expert for the session, Mr. Sandeep Adhyapak, is, a renowned expert in the field of water resource management and a distinguished advocate of rainwater harvesting, delivered an engaging and informative presentation during the expert session. The key highlights of his presentation and the discussions that followed are summarized below:

**VIDYAVARDHINI'S COLLEGE OF
ENGINEERING AND TECHNOLOGY, VASAI**

**GREEN CLUB of our college
Along with Department of Civil Engineering
Is organising an**

EXPERT SESSION ON

**Rain water Harvesting
-An effective tool for
Water Management**

DATE
FRIDAY, 08 SEPTEMBER

TIME
11AM TO 1:00PM

Venue: Ground Floor Seminar hall

The session is for all the
Engineering students and
Faculty members

SPEAKER
MR. SANDEEP ADHYAPAK
DIRECTOR OF WATERFIELD TECHNOLOGIES PVT.LTD

Importance of Rainwater Harvesting:

Mr. Adhyapak emphasized the critical significance of rainwater harvesting as a solution to the growing water scarcity issue in many regions. He stressed the importance of harnessing rainwater as a valuable source of freshwater that could supplement the existing water supply systems.

Vidyavardhini's College of Engineering & Technology

Department of Civil Engineering

Benefits of Rainwater Harvesting:

The expert session detailed the various advantages of rainwater harvesting, including its potential to reduce the strain on traditional water resources, mitigate flooding, and contribute to groundwater recharge. Moreover, it was highlighted that this method can lead to significant cost savings and promote water self-sufficiency at both individual and community levels.

Techniques and Technologies:

Mr. Adhyapak provided insights into different rainwater harvesting techniques, such as rooftop rainwater harvesting, surface runoff harvesting, and groundwater recharge systems. He discussed the technological advancements in rainwater harvesting equipment and systems that can enhance efficiency and sustainability.

Case Studies:

The expert session featured several successful case studies of rainwater harvesting projects from around the world. These real-world examples demonstrated the feasibility and positive outcomes of adopting rainwater harvesting practices.

Regulatory and Policy Framework:

The importance of supportive regulatory and policy frameworks for the promotion of rainwater harvesting was emphasized. Mr. Adhyapak discussed the need for governments and local authorities to implement incentives, regulations, and standards to encourage and regulate rainwater harvesting.

Community Engagement and Education:

Mr. Adhyapak stressed the importance of community engagement and education to promote the widespread adoption of rainwater harvesting. He highlighted the role of educational institutions, NGOs, and local communities in creating awareness and building capacity.

Q&A Session:

Following the presentation, there was a lively and interactive question and answer session where participants had the opportunity to seek clarifications and delve deeper into specific aspects of rainwater harvesting.

Vidyavardhini's College of Engineering & Technology

Department of Civil Engineering

Conclusion:

In conclusion, the expert session on rainwater harvesting by Mr. Sandeep Adhyapak was highly informative and well-received by the participants. It shed light on the potential of rainwater harvesting as an effective tool for water management, addressing water scarcity issues, and promoting sustainable water use practices. It also underscored the importance of collaborative efforts between governments, organizations, and communities to implement and encourage rainwater harvesting.

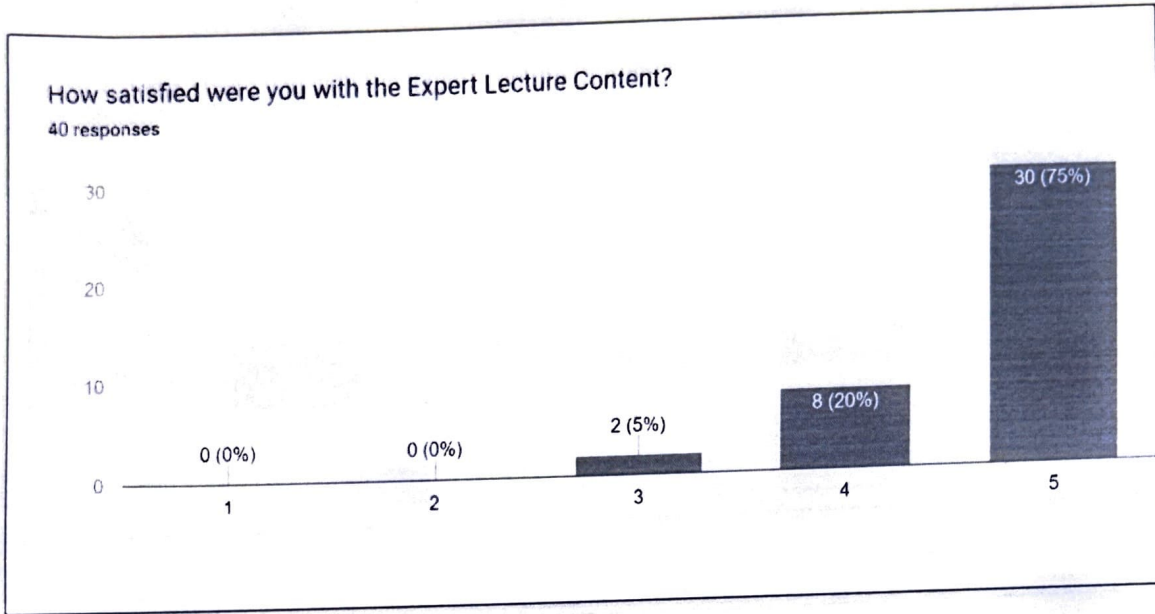

The knowledge and insights shared during this expert session will undoubtedly contribute to advancing the cause of sustainable water management and the widespread adoption of rainwater harvesting techniques.

Report on Training Programme on “ Youth Engagement & Water Stewardship – Training Program of Green Club faculty Co Ordinator”

Title: “ Youth Engagement & Water Stewardship – Training Program of Green Club faculty Co Ordinator “organized by UNICEF and Higher and Technical Education Department of Government of Maharashtra

Venue: Bharati Vidyapeeth Institute of Technology , Kharghar, Navi Mumbai

Time: 9:00 A.M. to 4:30 P.M.

Objective:

1. Appoint the Green Club Faculty Coordinators of each Institution and given them training
2. Mandatory to make Green Club of each Institution with minimum 100 students
3. Conduct activities under Green Club and submit the report monthly to the Master Trainer

Description:

Youth Engagement & Water Stewardship – Training Program of Green Club faculty Co Ordinator was organized by UNICEF and Higher and Technical Education Department of Government of Maharashtra . Ms. Puja Kadam, Assistant Professor from Civil Engineering is the Green Club Faculty Coordinator (GCFC) for Vidyavardhinis College of Engineering and Technology. This is an Initiative of Government where its is mandatory to make a Geen Club in the Institution with minimum 100 students and 1 or 2 Green Club Faculty Coordinator. Out of the total students members in the Green Club, 1 elected students will be Green Club President , 1 as Green Club Vice President, 1 as Green Club Campaign Coordinator and 1 AS Green Club Documentation Coordinator . The confirmation of the formation of the club along with the name of the Green Club Faculty Coordinator (GCFC) and 4 elected students for the above posts has to be submitted by 15/08/2023, Tuesday. This club will be active for 2 years from 2023-2025.

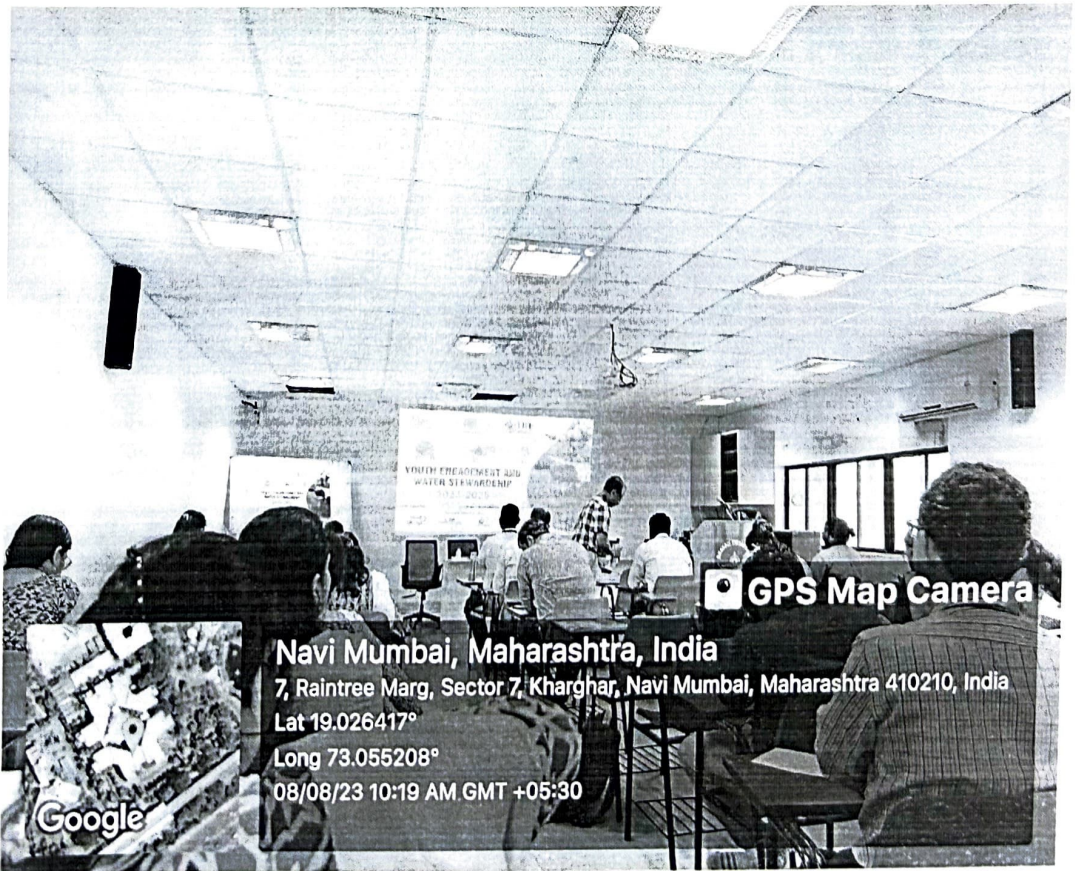

Green club activities will be focused on the following themes: Water Conservation, Waste Management and Circularity, Energy Efficiency, Circularity and Biodiversity Conservation.. The club is expected to have an Annual Activity Calendar and deliverables to measure the impact of the activities. Interested students can enroll themselves in the respective activities.

The Campaign Coordinator can chalk out the campaigns from the idea suggested by the majority of student members and will plan the details by consulting the President and Vice President and Faculty Coordinators.

Minutes of all meetings and reports of activities should be documented on paper and supported with photographs and videos. The Documentation Coordinator is responsible for it. Experiences, testimonies, and reports regarding water conservation activities need to be shared in the 'Why Waste?' mobile application and overall activities on the Green Cub social media handles and U-Report. U-Report is a mobile empowerment program that connects young people all over the world to information that will change their lives and influence decisions.

Subject: Application for OD on 08/08/2023 for attending the training program arranged by UNICEF, Palghar District through DTE at Bharati Vidyapeeth College of Engineering, Kharghar.

Respected Sir,

I, Ms. Puja C. Kadam, Assistant Professor from Civil Engineering Department, is appointed as program officer for Green club of Palghar District and hence I am supposed to attend a training program of the same on 08/08/2023 for attending the training program at Bharati Vidyapeeth College of Engineering, Kharghar. I request you to grant exam OD for the same.

Thanking you,

Regards

Ms. Puja C. Kadam

Report on *Tree Plantation*

Keeping the spirit of *Vanmahotsav*, alive with the ongoing tree plantation drive all across the country, a tree plantation programme was held in our **Vidyavardhini's College of Engineering and Technology Vasai Road** campas on 17th July 2018.

Tree plantation drive inaugurated by respected Secretary of our Institute **Shree Bhausahab Mohol** and **Principal Shree Dr. Vankudre** by planting and watering few saplings. Heads of all department, Registrar, enthusiastic teaching and non-teaching staff with students were taken part in tree plantation drive.

Saplings are taken from local nursery. We selected saplings such as Indian Pongamia (Karanja), Golden Rain tree (Bahava), Cassia, Legistonia, Nag chafa, Ashoka and Bottlebrush.

We Planted 50 saplings on the periphery of our campas.

The tree plantation drive organized by Tree Plantation Committee.

Following are some snaps of tree plantation drive;

Criteria Number: 7

Criteria Name: **Institutional Values and Best Practices**

Sub criteria Number: 7.1

Sub-criteria Name: **Institutional Values and Social
Responsibilities**

7.1.2 The Institution has facilities and initiatives for

1. Alternate sources of energy and energy conservation measures
2. Management of the various types of degradable and non-degradable waste
3. Water conservation
4. Green campus initiatives
5. Disabled-friendly, barrier free environment.

This document contains sample for calculation for Alternate sources of energy and energy conservation measures.

The Institution Has facilities for alternate sources of energy conservation measures

1)Yes college had solar Energy set up, below is the solar power consumption chart

Month	Total Power Generated through Solar(KW)	Total MSEB Power Consumption	Total power fed to Grid	Actual Total Power Consumption	% of Solar Power	Per kVA unit Generation (For 50 kVA System)	Saving (Assuming Rs.12/Unit)
Apr-22	6829	30510	758	36581	18.67	136.58	81948
May-22	6343	20877	555	26665	23.79	126.86	76116
Jun-22							
Jul-22	4616	5826	0	10442	44.21	92.32	55392
Aug-22	3826	26049	171	29704	12.88	76.52	45912
Sep-22	4107	21903	333	25677	15.99	82.14	49284
Oct-22	6101	22698	993	27806	21.94	122.02	73212
Nov-22	5826	20796	207	26415	22.06	116.52	69912
Dec-22	5465	19428	372	24521	22.29	109.3	65580
Jan-23	6353	17754	438	23669	26.84	127.06	76236
Feb-23	6302	25410	204	31508	20.00	126.04	75624
Mar-23	6841	31971	525	38287	17.87	136.82	82092
Apr-23	7199	30669	585	37283	19.31	143.98	86388
Average	5817.33	22824.25	428.42	28213.17	22.15	116.35	69808.00

2)Wheeling to the Grid:

Yes (see above Chart) Total 428.42KW power fed to grid

3)use of LED bulbs/power efficient equipment

Total 95% LED Bulbs/LED Tube lights are used, 5% are Standard Fluorescent Tube lights.

Percentage Lighting through LED bulb	Percentage Lighting through other sources
95%	5%

Calculations:

Total power Generated Through solar=6829

Total MSEB Power Consumption =30510

Total Power fed to grid =758(This power fed is when college is closed on Saturday and Sunday)

Actual Total Power consumption=30510+6071=36581(6829-758=6071)

% of solar Power=6829/36581=18.67

Total solar Power Generation =6829/50=136.58 (our power substation is of 50 Kva system)

Saving (Assuming Rs 12/unit)=12X6829=81948

CONDITIONS

- The total bill amount of the bill may be remitted by a Crossed Demand Draft/Cheque drawn in favor of "Maharashtra State Electricity Distribution Co. Ltd." Whenever Security Deposit is demanded separate Cheque/Bank Draft should be sent.
- The current bill is payable within fifteen days from the date of issue of the bill. Even if there is any discrepancy in the bill or any other clarification needed, consumers are requested to pay the billed amount in full provisionally or under protest subject to review and subsequent adjustment, so that payment of delayed payment charges is avoided.
- This bill is issued subject to the provision of the "Conditions and Miscellaneous charges for supply of Electrical Energy" of the MSEDCL.
- Please quote the Consumer Number on the back of the Cheque. The payment of this bill should be made at Company's office only.
- If the cheque is sent by post, the same should be posted three clear days in advance of the due date.
- In case of payment made through RTGS/NEFT/Cheque/DD/Pay Order, the date of amount credited to MSEDCL's account will be treated as receipt date.

TCS Details

Bill Date	Amount for TCS	TCS Rate	TCS Amount
05-Oct-23	8,19,133.00	0.1%	819.13

Section 206C(1H) of the Income-tax Act, 1961 mandates MahaVitaran to collect tax at source ["TCS"] from its consumers at the rate of 0.1%* as and when the aggregate energy bill of a consumer** exceeds INR 50 lakhs in a financial year (i.e. the year starting from April and ending in March). Thus at any point in time, during a financial year if the aggregate energy bill of a consumer exceeds INR 50 lakhs then the consumer will be additionally required to pay TCS @ 0.1%* on the sales consideration. In case of incomplete/adhoc payments to MahaVitaran, MahaVitaran will adjust the payment(s) in a manner whereby the amount proportionate to the required TCS will be first adjusted and the balance will be considered as outstanding electricity charges to which the provisions of section 56 of the Electricity Act, 2003 - relating to disconnection of supply in default of payment will apply.

For the financial year 01 April 2020 to 31 March 2021 the aggregate limit of INR 50 lakhs will be considered in respect of energy bills raised on and after 01 April 2020 onwards.

* 0.075% if the amount is paid or credited during the period 14 May 2020 to 31 March 2021 in terms of the Press Release dated 13 May 2020 issued by the Central Board of Direct Taxes.

** consumer - For the purpose of TCS, a consumer would mean an entity holding a valid Permanent Account Number ["PAN"]. In case a consumer holds various consumer ids/consumer numbers spread across the state of Maharashtra for the purpose of section 206C(1H) of the Income-tax Act, 1961 all the consumer ids/consumer numbers will be treated as one consumer based on its PAN.

***if a consumer does not hold a valid PAN the rate of TCS will be applicable @ 1%

Sub: Revised tax rates as per applicable GST & Co-ordination for Subsidy of solar project

Dear Sir,

This is with reference to your purchase order (No.: VCET/1121/OFFICE/ADMIN/02/17-18 Dated: 22.05.2017) for 50kW Grid connected Solar PV Rooftop system in which the taxes were considered as per the previous applicable taxes i.e. Service tax @15% & VAT/ CST, but now after introduction of GST the applicable tax rates are revised i.e. Taxes on Supply @ 5% & Taxes on Services @18% hence we hereby requesting you to please consider the revised applicable tax rates as per GST in the cost of project & release the payments accordingly.

Aside this with reference to the subsidy of subjected project, we have completed our all documentation work & received the in principal sanction letter (Letter Ref No. GCRT / 2017/CR-1/ Solar / 3371 Dated: 09.08.2017) for the same from Maharashtra Energy Development Agency (MEDA) and now we are also co-ordinating for the further process of joint inspection of plant and subsidy disbursement.

We are hoping for positive response & valuable support from you on the above mentioned subject.
 Thanking you

For OHMS Energy Pvt. Ltd

To
M/s. Ohms Energy Pvt. Ltd,
713, the Summit Business Bay, Behind Guru,
Nanak Petrol Pump, Near Western Express Highway,
Andheri Kurla Road, Andheri East, Mumbai 400 069

Subject: - In-principle sanction for installation of Grid Connected Rooftop Projects in the State of Maharashtra.

Ref: - 1) MNRE 100MW sanction letter no. 03/106/2015/GCRT dated 26/04/2016
2) EoI no.GCRT/CFA/2016-17/01

Dear Sir,

In accordance with Ministry of New and Renewable Energy sanction no. 03/106/2015/GCRT dated 26th April 2016 on the scheme of 100 MW Grid Connected Rooftop Projects in the state of Maharashtra and with above reference to proposal of **Open Category channel partner**, I am directed to convey the in-principle sanction for capacity of **aggregate 61.5 kWp** to the above mentioned **Open Category channel partner** for installing Grid Connected Rooftop System.

1. The details of the which is given as follows:-

Sr. No.	Name of Beneficiaries	Category of Beneficiary	Capacity Sanction in kWp	Eligible/Sanction CFA (Rs.)*
1	Deo Enclave Co-op. Hsg. Sco. Ltd Deo Enclave Co-op. Hsg. Sco. Ltd. Chitakar Ketkar Marg, Vile Parle (E), Mumbai – 400 057	Residential	11.5	██████████
2	Vidyavardhini's College of Engineering & Technology K T Marg, Vasai (W), Dist: Palghar, Maharashtra Pin- 401202	Institutional	50	██████████
Total :-			61.5	██████████

*This sanction capacity eligible CFA is of 'tentative in nature' based on the information submitted by M/s. Ohms Energy Pvt. Ltd. Actual sanction capacity of project & eligible CFA will be finalized after Joint inspection of the system and actual work done. Also please note that if net meter is installed before the In-Principle sanction as per utility record, then the In-Principle sanction released by MEDA automatically stands cancelled.

2. The approved time schedule for project completion is as per following table from the date of sanction.

Sr. No.	Capacity Sanction in kWp	Time Duration for completion of project
1	1 to 50	45 Days
2	Above 50 to 100	90 Days
3	Above 100 to 500	120 Days

3. **Open Category channel partner** has to submit the project completion report within time, failing to which the in-principle sanction letter given to this project stands cancelled.
4. **Open Category channel partner** has to follow all the guidelines and technical standards of given in the website for grid connected rooftop solar.
5. **Open Category channel partner** will give undertaking for 5 years CMC of the project.
6. Concerned MEDA Divisional Office will inspect the system after receipt of installation of system by **Open Category channel partner**.
7. MEDA will release the CFA that is Rs.18,300/- per kWp on the basis of L1 rate Rs.61,000/- per kWp (30% of L1 rate) or 30% of the project cost whichever is less.
8. Capacity of inverter must be same as per the capacity of solar power plant. The inverter must be as per IEC standard and system must be installed as per MNRE specifications only.
