NAAC accredited, 4 Programmes Accredited by NBA

Criteria Number: 7

Criteria Name: Institutional Values and Best Practices

Sub criteria Number: 7.3

Sub-criteria Name: Institute Distinctiveness

7.3.1 Portray the performance of the Institution in one area distinctive to its priority and thrust within 1000 words.

Institute Distinctiveness

VCET offers a plethora of opportunities for students and faculty to enhance their skills, ensuring their relevance to industry and societal needs. VCET has implemented various capacity-building initiatives aimed at nurturing overall personality of the students and enhancing the technical competencies of faculty, supported by the institute's infrastructure and financial resources.

Capacity-building initiatives for students

- Curriculum Enhancement:

At VCET, fostering technical proficiency among students is paramount. In the academic curriculum, students undertake innovative mini- and major projects aimed at addressing industrial and societal challenges while upholding environmental sustainability goals. Well-defined rubrics are used for monitoring and assessing projects and all other curriculum-related evaluations. The outcome of these measures ensures students development in technical proficiency, problem-solving skills, environmental sustainability awareness, and comprehensive learning assessment through a transparent evaluation framework.

- Bridging the Emerging Technology Skill Gap:

Keeping the students abreast of technological advancements and equipping them with relevant technical skills is a continuous endeavor at VCET. VCET offers open elective courses such as Management Information System, Disaster Management & Mitigation Measures, Energy Audit & Management, Project Management, etc., and honor/minor courses such as Smart Cities, Cyber Security, IoT, Artificial Intelligence and Machine Learning, etc. These courses are introduced to students by subject experts who also highlight their industry relevance.

Beyond academics, VCET organizes numerous student development programs throughout the year to bridge the gap between academia and industry. Furthermore, to keep themselves updated on the recent trends in technology, students pursue online courses on emerging technologies through Learning Management Systems (LMS).

To provide students with invaluable exposure to the professional industrial landscape, VCET's Industry Institute Interaction Cell (IIC) has dedicated faculty members who actively seek out

NAAC accredited, 4 Programmes Accredited by NBA

industry partnerships. These collaborations have resulted in numerous MoUs covering projects, expert sessions, workshops, internships, industrial visits, etc. Additionally, VCET also offers internships and training through the established Centers of Excellence and industry collaborations, including the Siemens Center of Excellence, Texas Innovation Lab, and E-Yantra Robotics laboratory in collaboration with IITB.

To assess technical proficiency, students actively participate in a diverse array of activities such as paper presentations, project competitions, hackathons, product showcases, workshops, etc.

- Research Aptitude:

VCET has taken many measures to inculcate research aptitude among the students through the Research and Development (R&D) cell. The Institute Innovation Council (IIC) organizes workshops on innovative ideas and product development. Students take up innovative and original research-based and industry-sponsored projects. To assess their research aptitude, students participate in state and national-level project competitions like Avishkar and the Smart India Hackathon and present or publish their research findings at national and international conferences. Students also file patents and copyrights to safeguard their research works. VCET provides financial support for all the research activities.

- Competent Professional

To enhance students' employability, VCET's Training and Placement(T&P) cell conducts technical and aptitude training and soft skills training programs through external agencies such as Gyanteerth, Coding Genius, etc. Students' employability is assessed through external agencies like SHL Aspiring Minds, right from the first year. To monitor the progress of the students, training programs are planned based on these assessments. VCET also conducts career guidance sessions to promote higher education. All these activities are provided free of charge to the students. In collaboration with IIC, the T&P cell maintains strong ties with industries across various sectors, facilitated by the alumni network.

VCET has established E-Cell to promote entrepreneurship. Additionally, events such as Udyam Samman (Industry Institute Meet) and Vasai Virar Startup Fest (VVSF) serve to strengthen the bond between the institute and industry.

- Social Responsibility and Sustainable Development:

Instilling ethical-moral values and a sense of social responsibility is integral to the holistic development of the students. VCET organizes sessions and events promoting sustainable living practices, such as energy conservation week, donations, and clean-up drives. Students also actively participate in various community service activities under the VCET-National Service Scheme (NSS).

- Social Skills

VCET emphasizes the holistic development of students, addressing both soft skills and physical and mental well-being. To enhance students' confidence, language skills, communication skills, time management skills, etc., many initiatives, including an annual literary festival,

language software utilization, and soft skills training programs, are conducted regularly. For physical and mental wellbeing, VCET hosts annual sports and cultural festivals and provides counseling services. The financial aspects of all these activities are borne by the institute.

VCET recognizes students' academic achievements, technical proficiency, research, leadership, and contribution to the institute and society through the Best Outgoing Student award.

Capacity-building initiatives for faculty

- Effective teaching-learning skills

For effective teaching and learning practices and to enhance the quality of content delivery, sessions are conducted by the Internal Quality Assurance Cell (IQAC) on outcome-based education (OBE), the National Education Policy (NEP), exam reforms, etc. Faculty undergoes teaching-learning and pedagogical courses conducted by NPTEL, NITTTR, and other MOOC courses.

- Skill Upgradation and Industry Connect:

VCET empowers faculty to enhance their skillsets and stay updated with emerging technologies and academic advancement by taking care of both monitory and non-monitory aspects. To understand the trends in technology used in the industry and skill upgradation, faculty interact with industry professionals, undergo industrial training, and participate in faculty development programs. With the support of the Institute, faculty actively contribute to scholarly discourse through research paper publications, books, book chapters, patent filings, and copyright registrations.

- Holistic faculty empowerment

Emphasizing the importance of holistic growth, VCET organizes expert sessions on mental wellbeing, stress management, finance, investments, etc. Empowerment is showcased through personal and the institute's commitment to community engagement and social responsibility. Faculty engage in outreach activities, raising awareness about basic science and technology and emerging areas among schoolchildren. Furthermore, faculty actively participate in donation drives, cleanliness campaigns, and awareness initiatives.
