AC 05/05/2018 Item No. 4.56

From Co-Coordinator's Desk:

To meet the challenge of ensuring excellence in engineering education, the issue of quality needs to be addressed, debated, and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. In line with this Faculty of Technology of University of Mumbai, has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty of Technology, University of Mumbai, in one of its meeting unanimously resolved that, each Board of Studies shall prepare some Program Educational Objectives (PEO's) and give freedom to affiliated Institutes to add few (PEO's), course objectives and course outcomes to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. It was also resolved that, maximum senior faculty from colleges and experts from industry to be involved while revising the curriculum. I am happy to state that, each Board of Studies has adhered to the resolutions passed by Faculty of Technology, and developed curriculum accordingly. In addition to outcome based education, **Choice Based Credit and Grading System** is also introduced to ensure quality of engineering education.

Choice Based Credit and Grading System enable a much-required shift in focus from teacher-centric to learner-centric education. Since the workload estimated is based on the investment of time in learning, not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. University of Mumbai has taken a lead in implementing the system through its affiliated Institutes. Faculty of Technology has devised a transparent credit assignment policy adopted ten points scale to grade learner's performance. **Choice Based Credit and Grading System** were implemented for First Year of Engineering (Undergraduate) from the academic year 2016-2017. Subsequently this system will be carried forward for Second Year of Engineering (Undergraduate) in the academic year 2017-2018 and so on.

Dr. Suresh K. Ukarande Coordinator, Faculty of Technology, Member - Academic Council University of Mumbai, Mumbai

Preamble:

The overall technical education in our country is changing rapidly in manifolds. Now it is very much challenging to maintain the quality of education with its rate of expansion. To meet present requirement a systematic approach is necessary to build the strong technical base with the quality. Accreditation will provide the quality assurance in higher education and to achieve recognition of the institution or program meeting certain specified standards. The main-focus of an accreditation process is to measure the program outcomes, essentially a range of skills and knowledge that a student will have at the time of graduation from the program that is being accredited. Faculty of Technology of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

I, as a Chairman, Board of Studies in Instrumentation Engineering of University of Mumbai, happy to state here that, Program Educational Objectives (PEOs) were finalized for undergraduate program in Instrumentation Engineering, more than ten senior faculty members from the different institutes affiliated to University of Mumbai were actively participated in this process. Few PEOs and POs of undergraduate program in Instrumentation Engineering are listed below;

Program Educational Objectives (PEOs)

- Graduates will have successful career in industry or pursue higher studies to meet future challenges of technological development.
- Graduates will develop analytical and logical skills that enable them to analyze and design Instrumentation and Control Systems.
- Graduates will achieve professional skills to expose themselves by giving an opportunity as an individual as well as team.
- > Graduates will undertake research activities in emerging multidisciplinary fields.

Program Outcomes (POs)

- Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

- Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

Dr. S. R. Deore, Chairman, Board of Studies in Electrical Engineering, Member - Academic Council University of Mumbai

| Course objectives | To impart the knowledge of different industrial unit operations. To make the students capable to design and develop instrumentation and control schemes for industrial process To give them overview of various process industries, hazardous areas and their classification. | ses. |
| Course Outcomes | The students will be able to: Explain working and control of various heat transfer unit operations Explain working and control of various heat and mass tranunit operations Explain the miscellaneous process equipment and their co Describe the processes of various continuous process industries and instrumentation involved in them. Describe the processes of various batch process industri instrumentation involved in them. | ontrol |
| | 6. Classify hazardous areas in the industry. | |

Prerequisite: Temperature, flow, pressure sensors, fundamentals of process instrumentation and control, control schemes like feedback, feedforward, cascade, split range, selective etc., basics of unit operations.

| Module | Content | Hrs | CO Mapping |
|--------|--|-----|---------------|
| | Control System for Heat transfer unit operations: Introduction to unit operations and processes, concept of heat transfers and energy balance, heat transfer coefficient. Heat exchanger control: classification as per fluid flow arrangement and construction, feedback, feed-forward, bypass control schemes, fouling in heat exchangers. | | |
| 1 | Boiler control: Types, working and operation of boilers, Terms related-Shrink and swell effect and excess oxygen, boiler efficiency, boiler performance terminology. Boiler controls- Drum level control- Single, two and three elements, and Combustion Control-Type 1, 2, 3 and 4, steam temperature control, boiler pressure control, furnace draft control, Burner Management System. Evaporator control: Evaporator terminologies, Types of Evaporator, mathematical model for evaporator, control systems for Evaporator – feedback, cascade, feed forward and selective control. Furnace control: Start- up heaters, fired re-boilers, process and safety controls. | 13 | CO1 |
| 2 | Control System for Heat and mass transfer unit operations: Distillation column: Basic principle, Distillation equipment and its accessories. Batch and continuous distillation, Binary product distillation, multi-product distillation, side-draw product distillation column. Distillation column control strategies- Top and bottom product composition controls, Using chromatograph, Pressure controls, Vacuum distillation, Vapors recompression and pressure control, Feed controls- Column feed controls and Feed temperature control, economizer. Dryer control: Process of drying, types of dryer- Tray, Vacuum dryer, fluidized bed, Double drum dryer, rotary, turbo and spray, and their control strategies. Crystallizers: Process of crystallization, Super-saturation methods, types of crystallizers. Reactor control: Reactor characteristics, runaway reaction, various schemes of temperature control of reactors. | 12 | CO2 |
| 3 | Miscellaneous process equipment: Compressor- Classification, Phenomenon of Surge for centrifugal compressors, Methods of surge control for compressors. Gas turbine- Introduction, gas turbine layouts, closed cycle gas turbine, Engine controls. | 05 | CO3 |
| 4 | Continuous Process Industries: Refinery Industry: Process flow diagram, separation, Treatment-Hydro- desulphurization unit, conversion methods- Fluid Catalytic Cracking, blending, sensors and control schemes. | 07 | CO4 |

| | Iron and steel Industry: Process flow diagram, Sensors and Control schemes. | | |
|---|---|----|-----|
| 5 | Batch Process Industries:Food processing: Milk pasteurization.Pharmaceutical industries-Penicillin-G production, sensors and controlschemes. | 07 | CO5 |
| 6 | Safety in Instrumentation control systems: Area and material classification as per IEC and NEC standard, techniques used to reduce explosion hazards, intrinsic safety, and installation of intrinsically safe systems. | 04 | CO6 |

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

End Semester Theory Examination:

- 1. Question paper will comprise of 6 questions, each carrying 20 Marks.
- 2. Total 4 questions need to be solved.
- 3. Question No. 1 will be compulsory and based on entire syllabus wherein sub questions of

4 to 5 marks will be asked.

- 4. Remaining questions will be mixed in nature.
- 5. In question paper weight age of each module will be proportional to number of respective

Lecture hours as mentioned in the syllabus.

| Subject Code | Subject Name | Credits |
|--------------------------|--|-------------|
| ISDLO7031 | Image Processing | 4 |
| | 1. To explain basic principles of Image processing. | |
| | 2. To apply time and frequency domain transformation method on 2 | 2D Images |
| | 3. To study different Image enhancement techniques in spatial and | l frequency |
| | domain. | |
| Course Objectives | 4. To study Image restoration techniques to reduce the noise a | nd recover |
| | original Image. | |
| | 5. To study Lossy and lossless Image compression by different met | hods. |
| | 6. To study Image morphology and segmentation techniques to | o represent |
| | images into more meaningful and easier to analyze. | |
| | Students will be able to - | |
| | 1. Describe general terminology of Image processing. | |
| | 2. Examine Images and their analysis by various transformation tec | hniques. |
| | 3. Apply basic Image enhancement operations on Images. | |
| Course Outcomes | 4. Evaluate mathematical tools such as Image morphology a | and Image |
| | segmentation to extract various Image components. | |
| | 5. Discuss Image compression methods | |
| | 6. Discuss Image degradation and restoration model. | |
| | | |

Prerequisite: Knowledge of Fundamentals of Engineering Mathematics, Basic Operation with Matrices, Signals and Systems and Digital Signal Processing.

| Module | Contents | Hrs | CO |
|--------|---|-----|---------|
| | | | mapping |
| 1 | Introduction to Image processing: -Concept of Digital Image, | 08 | CO1 |
| | Fundamental steps in Image processing, Components of Image | | |
| | processing systems, Elements of visual perception, Image formation | | |
| | model, Sampling and Quantization of Image, Relationships between | | |
| | pixels like neighbours of pixel, Adjacency, Connectivity, Distance | | |
| | measures, Translation, Scaling, Rotation and Perspective projection | | |
| | of Image. | | |

| - | | 0- | 961 |
|---|---|----|-----|
| 2 | Image Transformation : -Orthogonal and Orthonormal Function, 2D Discrete Fourier transform and its properties, Fast Fourier transform of Image, Discrete Cosine and Sine transform (2D), Walsh-Hadamard transform, Haar transform, Slant transform, Karhunen-Loeve transform, Introduction to Wavelet transform and its application. | 07 | CO2 |
| 3 | Image Enhancement: -Image enhancement in spatial domain, Basic gray level transformation like Image Negatives, Log transformations, Power Law transformations, Contrast stretching, Gray level and Bit plane slicing, Histogram processing, Enhancement using Arithmetic/Logic operation, Smoothing spatial filters, Sharpening spatial filters, Image enhancement in frequency domain, Smoothing frequency domain filters, Sharpening frequency domain filters, Homomorphic filtering. | 10 | CO3 |
| 4 | Morphological Image Processing: Logic operations of Binary Images, Dilation and Erosion, Opening and Closing, Hit or Miss transformation, Boundary extraction, Region filling, Extraction of connected component, Thinning, Thickening, Skeletons. Image Segmentation: Point, Line and Edge detection, Edge linking and boundary detection (Hough Transform), Thresholding, Region based segmentation: Image Registration: Introduction, Geometric transformation, Plane to plane transformation, Image Mapping models, Mutual Information, Entropy, Registration using MI, Introduction to Stereo Imaging | 10 | CO4 |
| 5 | ImageCompression:-NeedofImagecompression,Dataredundancy,Imagecompressionmodel,DifferencebetweenLossyandLosslesscompression,Imagecompressiontechnique(Huffman,Arithmetic,Runlength,LZWcoding),Predictivecoding(DPCM),JPEGandMPEGcompressionstandard. | 08 | CO5 |
| 6 | Image Restoration: -Image degradation/Restoration model, Noise models, Probability density function of important noises (Gaussian, Rayleigh, Gamma, Exponential, Uniform, Salt and Pepper), Restoration in presence of noise by spatial filtering (Mean, Median, Midpoint filter), Periodic noise reduction in frequency domain filtering (Band reject, Band pass, Notch filter), Point spread function, Inverse filtering, Weiner filtering. | 05 | CO6 |

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Theory Examination:

- 1) Question paper will comprise of 6 questions, each carrying 20 Marks.
- 2) Total 4 questions need to be solved.
- 3) Question No. 1 will be compulsory and based on entire syllabus wherein sub questions of 4 to 5 marks will be asked.
- 4) Remaining questions will be mixed in nature.
- 5) In question paper weightage of each module will be proportional to number of respective lecture hours as mentioned in the syllabus.

|-------------------------|--|---------|
| ISDLO7032 | Digital Control System | 4 |
| Course Objective | 1. To equip the students with the basic knowledge of digital systems | |
| | 2. To obtain the canonical forms of digital control systems | |
| | 3. To test the stability and steady state performance of digital control system. | |
| | 4. To design the controller and observer for digital control systems. | |
| Course Outcome | Students will be able to | |
| | 1. Understand the advantages and examples of digital control systems. | |
| | 2. Understand the basics of Discretization. | |
| | 3. Represent digital control system as pulse transfer function. | |
| | 4. Determine stability, and steady-state error of discrete time systems. | |
| | 5. Represent given system in different canonical forms. | |
| | 6. Design controller and observer with state space approach. | |

Prerequisite: Knowledge of Linear algebra, Fourier Series, Matrix Algebra, and Nyquist stability criterion.

| Module | Contents | Hr | CO |
|--------|---|----|-----|
| | | S | |
| 1 | Introduction | 10 | CO1 |
| | Block diagram of Digital Control System, Advantages & limitations of Digital | | |
| | Control System, comparison of continuous data & discrete data control | | |
| | system, Examples of digital control system, data conversion and quantization, sampling period considerations, sampling as impulse modulation, sampled | | |
| | spectra & aliasing, Reconstruction of analog signals, zero order hold, first | I | |
| | order hold. | | I |
| 2 | Principles of discretization- impulse invariance, finite difference | 06 | CO2 |
| | approximation of derivatives, rectangular rules for integration, Bilinear | | |
| | transformation, Mapping between s-plane and z-plane, Discrete PID controller. | | |
| 3 | Representation of digital control system | 06 | CO3 |
| | Linear difference equations, pulse transfer function, input output model, | | |
| | examples of first order continuous and discrete time systems, Signal flow | | |
| | graph applied to digital control systems. | | |
| 4 | Stability of digital control system in z-domain and Time domain analysis | 08 | CO4 |
| | Jury's method, R.H. criteria, Comparison of time response of continuous data | | |
| | and digital control system, steady state analysis of digital control system, | | |

| | Effect of sampling period on transient response characteristics. | | |
|---|--|----|-----|
| 5 | State space analysis Discrete time state equations in standard canonical forms, similarity transformation, state transition matrix, solution of discrete time state equation, Discretization of continuous state space model & its solution. | 08 | CO5 |
| 6 | Pole placement and observer designsConcept of reachability, Controllability, Constructability & Observability,Design of controller via Pole placement method, dead beat controller design,concept of duality, state observer design. | 10 | CO6 |

| Course objectives | To explain the fundamentals of PIC 18F Microcontroller a of the system. To discuss and explain the integrated hardware of th Microcontroller To illustrate various programming tools and development using assembly and higher level language. To examine and design, interfacing of PIC 18F Microcon different peripheral devices such as LCD, keyboard, ADC, To design applications using learned concepts of hardwar and interfacing. To describe the working of RTOS and related tasks | e PIC 18F of software ntroller with DAC etc. |
| Course Outcomes | The students will be able to: | |
| | Describe working of PIC 18F Microcontroller Archite Programming model. Discuss programming tools and construct software pe assembly or 'C' language. Illustrate the knowledge of operation of integrated components such as (CCP) module, ECCP module Synchronous Serial Port (MSSP) Module, Enhanced Synchronous, Asynchronous Receiver Transmitter Analog-To-Digital Converter (A/D) Module. Investigate and construct circuits for interfacing of components with PIC 18F Microcontroller. Design and develop sophisticated application based of Microcontroller such as Temperature controller, PID cont etc. Describe the principle of working of RTOS and related tasl | rograms in hardware le. Master Universal (EUSART), peripheral n PIC 18F roller, RTC |

Prerequisite: Knowledge of digital electronics, microcontrollers, programming skills

| Module | Contents | Hrs | CO Mapping |
|--------|--|-----|---------------|
| 1 | Introduction to PIC 18F Microcontroller PIC 18F Microcontroller architecture, Hardware PIC 18F Microcontroller family, PIC18F architecture, features PIC18F4520, | | |
| | Block diagram, Oscillator configuration, power saving modes. Memory model, EEPROM and RAM, Program Memory. Hardware multiplier, Interrupt structure. | 06 | CO1 |
| 2 | PIC 18F Software PIC18F addressing modes, Instruction set, Instruction format, Integrated Development Environment (IDE), Assembling, Debugging, and Executing a program using MPLAB IDE in assembly and embedded C. Data copy operation, Arithmetic operation, Branch and Skip operation, Logic operations, bit Operation, Stack and Subroutine, Code conversion programs and Software Design, Programming practice using assembly & C compiler. | 10 | CO2 |
| 3 | Integrated peripherals of PIC 18F Microcontroller I/O ports, Timer, capture/compare/PWM (CCP) module, ECCP module. Master Synchronous Serial Port (MSSP) Module, Enhanced Universal Synchronous, Asynchronous Receiver Transmitter (EUSART), Analog- To-Digital Converter (A/D) Module, Comparator module. | 08 | CO3 |
| 4 | PIC 18F Interfacing Interfacing to LCD, 7 segment display, Keyboard, ADC, DAC, relay, DC motor, Stepper Motor. | 08 | CO4 |
| 5 | Case Studies | 08 | CO5 |
| | PWM Generation, Digital encoder, PID Controller, Temperature controller, RTC, Speed Control of DC motors and similar system design | | |
| 6 | Introduction to Real Time Operating System | 08 | CO6 |
| | Introduction to RTOS concept. Tasks and task states, task and data, Semaphores and shared data. | | |
| | Multitasking operating systems, Context switching, task tables, and kernels, Task swapping methods (Time slice, Pre-emption, Co-operative multitasking) | | |
| | Scheduler algorithms (Rate monotonic, Deadline monotonic scheduling) Priority inversion, Tasks, threads and processes, Exceptions, Example of any tiny RTOS. | | |

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

End Semester Theory Examination:

- 1. Question paper will comprise of 6 questions, each carrying 20 Marks.
- 2. Total 4 questions need to be solved.
- 3. Question No. 1 will be compulsory and based on entire syllabus wherein sub questions of

4 to 5 marks will be asked.

- 4. Remaining questions will be mixed in nature.
- 5. In question paper weightage of each module will be proportional to number of respective

Lecture hours as mentioned in the syllabus.

| | 1. Explain the concept of intelligent building and BAS. | | | | | | |
| Course Outcomes | 2. Select the hardware and design of HVAC in building automation system. | | | | | | |
| | 3. Discuss the concept of energy management system. | | | | | | |
| | 4. Design and implement the safety system for building. | | | | | | |
| | 5. Design security and video management system for buildi | ing. | | | | | |
| | 6. Design and integrate the different system in BAS. | | | | | | |

Prerequisite: Fundamental of measurement and control, industrial automation, smart buildings.

| Module | Contents | Hrs | CO Mapping |
|--------|--|-----|---------------|
| 1 | Introduction to intelligent buildings: Definitions of intelligent building, Intelligent architecture and structure, Facilities management vs. intelligent buildings, Technology systems and evolution of intelligent buildings. Introduction to Building Automation System: Features, Characteristics, Drawbacks of Building Automation system. Various Systems of Building Automation – Building Management System, Energy Management System, Security System, Safety System, Video Management System. | 06 | CO1 |

| 2 | HVAC system: Introduction, HVAC, Sensors & Transducers – Temperature, Pressure, Level, Flow, RH. Meaning of Analog & Digital Signals, Valves and Actuators, Valve & Actuator Selection, Various Controllers, Concept of Controller IOs, Std Signals, Signal Compatibility between Controller & Field Devices. AHU – Concept, Components, Working Principle. AC Plant Room – Concept, Components, Refrigeration Cycle Working Principle, Chiller Sequencing, AC Plant Sequencing. Feedback Control Loops, Heat – Types, Heat Transfer Principles, Measurement of Heat Transfer. Psychrometry –Concept, ASHRAE Psychrometric Chart, Meaning of Various Terms – DBT, WBT, ST, RH, DPT, Sensible & Latent Cooling & Heating, Numericals. Job IO Summary Calculation, Controller Sizing, AI to DI Conversion, Cable Selection, Earthing – Meaning, Importance, Panel Earthing, EMI & Tackling EMI. Logic Examples, CL Programming. | 12 | CO2 |
|---|---|----|-----|
| 3 | Energy Management System: Concept, Energy Meters, Types, Meter Networking, Monitoring Energy Parameters, Analysis of Power Quality – Instantaneous Power, Active Power, Reactive Power, Power Factor, Voltage, Current. Effect of Power Quality on Energy Consumption, Energy Reports, Energy Conservation, Importance of Energy Saving. | 06 | CO3 |
| 4 | Safety Systems: Introduction, Fire –Meaning, Fire Development Stages, Fire Sensors & Detectors, Detector Placement, Detectors Required For Various Applications. Fire Extinguishing Principles, Fire Extinguishers & Its Classification. Fire Alarm System – Controllers, Components, Features, Concept of Fire Loop & Fire Devices, 2-Wire & 4-Wire Loops, Working Principle, System Description, Pre-alarm, Alarm, Trouble, Fault, Differences, Cable Selection, Installation Guidelines Best Installation Practices, Logic Example. NFPA and IS2189 Stds, System Programming. | 08 | CO4 |
| 5 | Security Systems: Introduction, Access Control – Concept, Generic Model, Components, Types, Features, Card Technologies, Protocols, Controllers, Concept of Antipassback, Biometrics, Issues With Biometrics, Cabling, Video Door phone, Intrusion Detection System – Sensors, Working Principle, Access Control System Programming. Video Management: Introduction, CCTV Cameras, CCD Camera Basics, Traditional | 10 | CO5 |

| | CCTV System, Video Recording, Drawbacks, Digital Video Recording, Features, Functionalities, Digital Vs Analog Recording, Digital Video Management System – Introduction, Features, Advancements & Differences from Earlier Video Techniques, TCP/IP Networking Fundamentals, System Network Load Calculations, Network Design. | |
|---|--|-----|
| 6 | Integrated Systems: Introduction, Integration of Building Management System, Energy Management System, Safety System, Security Systems & Video Management, Benefits of Integrated Systems, Challenges, Future Prospects of Integrated Systems. | CO6 |

| Course | To familiarize the students with the need, benefits and components of PLM To acquaint students with Product Data Management & PLM strategies |
|------------|---|
| Objectives | To give insights into new product development program and guidelines for designing and developing a product To familiarize the students with Virtual Product Development |
| | To familiarize the students with Virtual Product Development |
| | Student will be able to |
| | • Gain knowledge about phases of PLM, PLM strategies and |
| | methodology for PLM feasibility study and PDM implementation. |
| Course | • Illustrate various approaches and techniques for designing and |
| Outcomes | developing products. |
| Outcomes | • Apply product engineering guidelines / thumb rules in designing |
| | products for moulding, machining, sheet metal working etc. |
| | • Acquire knowledge in applying virtual product development tools for |
| | components, machining and manufacturing plan |

| Module | Contents | Hours | | | | | | |
|--------|--|-------|--|--|--|--|--|--|
| 1 | Introduction to Product Lifecycle Management (PLM):Product | 12 | | | | | | |
| | Lifecycle Management (PLM), Need for PLM, Product Lifecycle | | | | | | | |
| | Phases, Opportunities of Globalization, Pre-PLM Environment, PLM | | | | | | | |
| | Paradigm, Importance & Benefits of PLM, Widespread Impact of PLM, | | | | | | | |
| | Focus and Application, A PLM Project, Starting the PLM Initiative, | | | | | | | |
| | PLM Applications | | | | | | | |
| | PLM Strategies: Industrial strategies, Strategy elements, its | | | | | | | |
| | identification, selection and implementation, Developing PLM Vision | | | | | | | |
| | and PLM Strategy, Change management for PLM | | | | | | | |
| 2 | Product Design: Product Design and Development Process, Engineering | 09 | | | | | | |
| | Design, Organization and Decomposition in Product Design, Typologies | | | | | | | |
| | of Design Process Models, Reference Model, Product Design in the | | | | | | | |
| | Context of the Product Development Process, Relation with the | | | | | | | |
| | Development Process Planning Phase, Relation with the Post design | | | | | | | |
| | Planning Phase, Methodological Evolution in Product Design, | | | | | | | |
| | Concurrent Engineering, Characteristic Features of Concurrent | | | | | | | |

| | Engineering, Concurrent Engineering and Life Cycle Approach, New Product Development (NPD) and Strategies, Product Configuration and Variant Management, The Design for X System, Objective Properties and Design for X Tools, Choice of Design for X Tools and Their Use in the Design Process | |
|---|--|----|
| 3 | Product Data Management (PDM): Product and Product Data, PDM systems and importance, Components of PDM, Reason for implementing a PDM system, financial justification of PDM, barriers to PDM implementation | 06 |
| 4 | Virtual Product Development Tools: For components, machines, and manufacturing plants, 3D CAD systems and realistic rendering techniques, Digital mock-up, Model building, Model analysis, Modeling and simulations in Product Design, Examples/Case studies | 06 |
| 5 | Integration of Environmental Aspects in Product Design: Sustainable Development, Design for Environment, Need for Life Cycle Environmental Strategies, Useful Life Extension Strategies, End-of-Life Strategies, Introduction of Environmental Strategies into the Design Process, Life Cycle Environmental Strategies and Considerations for Product Design | 06 |
| 6 | Life Cycle Assessment and Life Cycle Cost Analysis: Properties, and Framework of Life Cycle Assessment, Phases of LCA in ISO Standards, Fields of Application and Limitations of Life Cycle Assessment, Cost Analysis and the Life Cycle Approach, General Framework for LCCA, Evolution of Models for Product Life Cycle Cost Analysis | 06 |

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project

Theory Examination:

- 1. Question paper will comprise of 6 questions, each carrying 20 marks.
- 2. Total four questions need to be solved.
- 3: Q.1 will be compulsory, based on entire syllabus wherein sub questions of 2 to 5 marks will be asked.
- 4: Remaining question will be randomly selected from all the modules.

| Course Objectives | To familiarize the students with various aspects of probability theory To acquaint the students with reliability and its concepts To introduce the students to methods of estimating the system reliability of simple and complex systems To understand the various aspects of Maintainability, Availability and FMEA procedure |
|----------------------|--|
| Course Outcomes | Student will be able to Understand and apply the concept of Probability to engineering problems Apply various reliability concepts to calculate different reliability parameters Estimate the system reliability of simple and complex systems Carry out a Failure Mode Effect and Criticality Analysis |

| Module | Contents | Hours | | | | |
|--------|--|-------|--|--|--|--|
| 1 | Probability theory: Probability: Standard definitions and concepts; | 10 | | | | |
| | Conditional Probability, Baye's Theorem. | | | | | |
| | Probability Distributions: Central tendency and Dispersion; Binomial, | | | | | |
| | Normal, Poisson, Weibull, Exponential, relations between them and | | | | | |
| | their significance. | | | | | |
| | Measures of Dispersion: Mean, Median, Mode, Range, Mean | | | | | |
| | Deviation, Standard Deviation, Variance, Skewness and Kurtosis. | | | | | |
| 2 | Reliability Concepts: Reliability definitions, Importance of Reliability, | 10 | | | | |
| | Quality Assurance and Reliability, Bath Tub Curve. | | | | | |
| | Failure Data Analysis: Hazard rate, failure density, Failure Rate, Mean | | | | | |
| | Time To Failure (MTTF), MTBF, Reliability Functions. | | | | | |
| | Reliability Hazard Models: Constant Failure Rate, Linearly increasing, | | | | | |
| | Time Dependent Failure Rate, Weibull Model. Distribution functions | | | | | |
| | and reliability analysis. | | | | | |
| 3 | System Reliability | 05 | | | | |
| | System Configurations: Series, parallel, mixed configuration, k out of n | | | | | |
| | structure, Complex systems. | | | | | |
| 4 | Reliability Improvement | 10 | | | | |
| | Redundancy Techniques: Element redundancy, Unit redundancy, | | | | | |

| | Standby redundancies. Markov analysis. | | | | | |
|---|--|----|--|--|--|--|
| | System Reliability Analysis - Enumeration method, Cut-set method, | | | | | |
| | Success | | | | | |
| | Path method, Decomposition method. | | | | | |
| 5 | Maintainability and Availability | 05 | | | | |
| | System downtime, Design for Maintainability: Maintenance | | | | | |
| | requirements, Design methods: Fault Isolation and self-diagnostics, | | | | | |
| | Parts standardization and Interchangeability, Modularization and | | | | | |
| | Accessibility, Repair Vs Replacement. | | | | | |
| | Availability – qualitative aspects. | | | | | |
| 6 | Failure Mode, Effects and Criticality Analysis: Failure mode effects | 05 | | | | |
| | analysis, severity/criticality analysis, FMECA examples. Fault tree | | | | | |
| | construction, basic symbols, development of functional reliability block | | | | | |
| | diagram, Fau1t tree analysis and Event tree Analysis | | | | | |

| | The course is blend of Management and Technical field. Discuss the roles played by information technology in today's business and define various technology architectures on which information systems are built |
|----------------------|---|
| Course Objectives | Define and analyze typical functional information systems and identify how they meet the needs of the firm to deliver efficiency and competitive advantage Identify the basic steps in systems development |
| | Identify the basic steps in systems development Define and analyze various MIS management responsibilities, including planning, budgeting, project management, and personnel management Discuss critical ethical and social issues in information systems |
| Course Outcomes | Student will be able to Explain how information systems Transform Business Identify the impact information systems have on an organization Describe IT infrastructure and its components and its current trends Understand the principal tools and technologies for accessing information from databases to improve business performance and decision making Identify the types of systems used for enterprise-wide knowledge management and how they provide value for businesses |

| Module | Contents | Hours |
|--------|---|-------|
| 1 | Introduction To Information Systems (IS): Computer Based Information | 7 |
| | Systems, Impact of IT on organizations, Importance of IS to Society. | |
| | Organizational Strategy, Competitive Advantages and IS. | |
| 2 | Data and Knowledge Management: Database Approach, Big Data, Data | 9 |
| | warehouse and Data Marts, Knowledge Management. | |
| | Business intelligence (BI): Managers and Decision Making, BI for Data | |
| | analysis and Presenting Results | |

| 3 | Ethical issues and Privacy: Information Security. Threat to IS, and | 6 |
|---|---|----|
| | Security Controls | |
| 4 | Social Computing (SC): Web 2.0 and 3.0, SC in business-shopping, | 7 |

| Course Objectives | Formulate a real-world problem as a mathematical programming model. Understand the mathematical tools that are needed to solve optimization problems. Use mathematical software to solve the proposed models. |
|----------------------|--|
| Course Outcomes | Student will be able to Understand the theoretical workings of the simplex method for linear programming and perform iterations of it by hand. Understand the relationship between a linear program and its dual, including strong duality and complementary slackness. Perform sensitivity analysis to determine the direction and magnitude of change of a model's optimal solution as the data change. Solve specialized linear programming problems like the transportation and assignment problems. Solve network models like the shortest path, minimum spanning tree, and maximum flow problems. Understand the applications of, basic methods for, and challenges in integer programming Model a dynamic system as a queuing model and compute important performance measures |

| Module | Contents | Hours | | | | |
|--------|---|-------|--|--|--|--|
| 1 | Introduction to Operations Research: Introduction, Historical | 2 | | | | |
| | Background, Scope of Operations Research , Features of Operations | | | | | |
| | Research, Phases of Operations Research, Types of Operations Research | | | | | |
| | Models, Operations Research Methodology, Operations Research | | | | | |
| | Techniques and Tools , Structure of the Mathematical Model, | | | | | |
| | Limitations of Operations Research | | | | | |
| 2 | Linear Programming: Introduction, Linear Programming Problem, | 6 | | | | |
| | Requirements of LPP, Mathematical Formulation of LPP, Graphical | | | | | |
| | method, Simplex Method Penalty Cost Method or Big M-method, Two | | | | | |
| | Phase Method, Revised simplex method, Duality, Primal - Dual | | | | | |
| | construction, Symmetric and Asymmetric Dual, Weak Duality Theorem, | | | | | |
| | Complimentary Slackness Theorem, Main Duality Theorem, Dual | | | | | |
| | Simplex Method, Sensitivity Analysis | | | | | |
| 3 | Transportation Problem: Formulation, solution, unbalanced | 6 | | | | |

| | Transportation problem. Finding basic feasible solutions – Northwest | |
|---|--|---|
| | corner rule, least cost method and Vogel's approximation method. | |
| | Optimality test: the stepping stone method and MODI method. | |
| | Assignment Problem: Introduction, Mathematical Formulation of the | |
| | Problem, Hungarian Method Algorithm, Processing of n Jobs Through | |
| | Two Machines and m Machines, Graphical Method of Two Jobs m | |
| | Machines Problem Routing Problem, Travelling Salesman Problem | |
| 4 | Integer Programming Problem: Introduction, Types of Integer | 6 |
| | Programming Problems, Gomory's cutting plane Algorithm, Branch and | |
| | Bound Technique. Introduction to Decomposition algorithms. | |
| 5 | Queuing models: queuing systems and structures, single server and | 6 |
| | multi-server models, Poisson input, exponential service, constant rate | |
| | service, finite and infinite population | |
| 6 | Simulation: Introduction, Methodology of Simulation, Basic Concepts, | 4 |
| | Simulation Procedure, Application of Simulation Monte-Carlo | |
| | Method: Introduction, Monte-Carlo Simulation, Applications of | |
| | Simulation, Advantages of Simulation, Limitations of Simulation | |
| 7 | Dynamic programming. Characteristics of dynamic programming. | 4 |
| | Dynamic programming approach for Priority Management employment | |
| | smoothening, capital budgeting, Stage Coach/Shortest Path, cargo | |
| | loading and Reliability problems. | |
| 8 | Games Theory. Competitive games, rectangular game, saddle point, | 4 |
| | minimax (maximin) method of optimal strategies, value of the game. | |
| | Solution of games with saddle points, dominance principle. Rectangular | |
| | games without saddle point – mixed strategy for 2 X 2 games. | |

| | Mitigation | 20 | | 20 | 00 | 0 03 - | | 100 | |
| | Measures | | | | | | | | |

| | • To understand the various types of disaster occurring around the world |
|------------------------------------|--|
| | • To identify extent and damaging capacity of a disaster |
| | • To study and understand the means of losses and methods to overcome /minimize it. |
| Course Objectives | • To understand role of individual and various organization during and after disaster |
| Objectives | • To know warning systems, their implementation and based on this to initiate training to a laymen |
| | • To understand application of GIS in the field of disaster management |
| | • To understand the emergency government response structures before, |
| | during and after disaster |
| | Student will be able to |
| | • Understand natural as well as manmade disaster and their extent and possible effects on the economy. |
| Course | • Planning of national importance structures based upon the previous |
| Course | history. |
| Outcomes | • Understand government policies, acts and various organizational |
| | structure associated with an emergency. |
| | • Know the simple do's and don'ts in such extreme events and act |
| | accordingly |

| Module | Contents | Hours |
|--------|---|-------|
| 1 | Introduction: Definition of Disaster, hazard, global and Indian scenario, general perspective, importance of study in human life, Direct and indirect effects of disasters, long term effects of disasters. | 03 |
| | Introduction to global warming and climate change. | |
| 2 | Natural Disaster and Manmade disasters: Natural Disaster: Meaning and nature of natural disaster, Flood, Flash flood, drought, cloud burst, Earthquake, Landslides, Avalanches, Volcanic eruptions, Mudflow, Cyclone, Storm, Storm Surge, climate change, global warming, sea level rise, ozone depletion. Manmade Disasters: | 06 |

| | Chemical, Industrial, Nuclear and Fire Hazards. Role of growing population and subsequent industrialization, urbanization and changing lifestyle of human beings in frequent occurrences of manmade disasters. | |
|---|---|----|
| 3 | Disaster Management, Policy and Administration: Disaster management: meaning, concept, importance, objective of disaster management policy, disaster risks in India, Paradigm shift in disaster management. Policy and administration: Importance and principles of disaster management policies, command and co-ordination of in disaster management, rescue operations-how to start with and how to proceed in due course of time, study of flowchart showing the entire process. | 06 |
| 4 | Institutional Framework for Disaster Management in India: Importance of public awareness, Preparation and execution of emergency management programme. Scope and responsibilities of National Institute of Disaster Management (NIDM) and National disaster management authority (NDMA) in India. Methods and measures to avoid disasters, Management of casualties, set up of emergency facilities, importance of effective communication amongst different agencies in such situations. Use of Internet and softwares for effective disaster management. Applications of GIS, Remote sensing and GPS in this regard. | 06 |
| 5 | Financing Relief Measures: Ways to raise finance for relief expenditure, Role of government agencies and NGO's in this process, Legal aspects related to finance raising as well as overall management of disasters. Various NGO's and the works they have carried out in the past on the occurrence of various disasters, Ways to approach these teams. International relief aid agencies and their role in extreme events. | 09 |
| 6 | Preventive and Mitigation Measures: Pre-disaster, during disaster and post-disaster measures in some events in general, Structural mapping: Risk mapping, assessment and analysis, sea walls and embankments, Bio shield, shelters, early warning and communication. Non Structural Mitigation: Community based disaster preparedness, risk transfer and risk financing, capacity development and training, awareness and education, contingency plans. Do's and don'ts in case of disasters and effective implementation of relief aids. | 06 |

7. Concepts and Techniques of GIS –C.P. Lo Albert, K.W. Yonng – Prentice Hall (India) Publications.

(Learners are expected to refer reports published at national and International level and updated information available on authentic web sites)

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project

- 1. Question paper will comprise of 6 questions, each carrying 20 marks.
- 2. Total four questions need to be solved.
- 3: Q.1 will be compulsory, based on entire syllabus wherein sub questions of 2 to 5 marks will be asked.
- 4: Remaining question will be randomly selected from all the modules.

| ILO7018 | Energy Audit and Management | 20 | 20 | 20 | 80 | 03 | - | 100 | |

| Course Objectives | To understand the importance of energy security for sustainable development and the fundamentals of energy conservation. To introduce performance evaluation criteria of various electrical and thermal installations to facilitate the energy management |
|----------------------|--|
| | • To relate the data collected during performance evaluation of systems for identification of energy saving opportunities |
| | Student will be able to |
| | • To identify and describe present state of energy security and its importance. |
| Course | • To identify and describe the basic principles and methodologies adopted in energy audit of an utility. |
| Outcomes | • To describe the energy performance evaluation of some common electrical installations and identify the energy saving opportunities. |
| | • To describe the energy performance evaluation of some common thermal installations and identify the energy saving opportunities |
| | • To analyze the data collected during performance evaluation and recommend energy saving measures |

| Module | Contents | Hours |
|--------|--|-------|
| 1 | Energy Scenario: Present Energy Scenario, Energy Pricing, Energy | 4 |
| | Sector Reforms, Energy Security, Energy Conservation and its | |
| | Importance, Energy Conservation Act-2001 and its Features. Basics of | |
| | Energy and its various forms, Material and Energy balance | |
| 2 | Energy Audit Principles: Definition, Energy audit- need, Types of | 8 |
| | energy audit, Energy management (audit) approach-understanding | |
| | energy costs, Bench marking, Energy performance, Matching energy use | |
| | to requirement, Maximizing system efficiencies, Optimizing the input | |
| | energy requirements, Fuel and energy substitution. Elements of | |
| | monitoring& targeting; Energy audit Instruments; Data and information- | |
| | analysis. Financial analysis techniques: Simple payback period, NPV, | |
| | Return on investment (ROI), Internal rate of return (IRR) | |

| 3 | Energy Management and Energy Conservation in Electrical System: Electricity billing, Electrical load management and maximum demand Control; Power factor improvement, Energy efficient equipments and appliances, star ratings. Energy efficiency measures in lighting system, Lighting control: Occupancy sensors, daylight integration, and use of intelligent controllers. Energy conservation opportunities in: water pumps, industrial drives, induction motors, motor retrofitting, soft starters, variable speed drives. | 10 |
|---|---|----|
| 4 | Energy Management and Energy Conservation in Thermal Systems: Review of different thermal loads; Energy conservation opportunities in: Steam distribution system, Assessment of steam distribution losses, Steam leakages, Steam trapping, Condensate and flash steam recovery system. General fuel economy measures in Boilers and furnaces, Waste heat recovery use of insulation- types and application. HVAC system: Coefficient of performance, Capacity, factors affecting Refrigeration and Air Conditioning system performance and savings opportunities | 10 |
| 5 | Energy Performance Assessment: On site Performance evaluation techniques, Case studies based on: Motors and variable speed drive, pumps, HVAC system calculations; Lighting System: Installed Load Efficacy Ratio (ILER) method, Financial Analysis. | 4 |
| 6 | Energy conservation in Buildings: Energy Conservation Building Codes (ECBC): Green Building, LEED rating, Application of Non-Conventional and Renewable Energy Sources | 3 |

| | • To understand the characteristics of rural Society and the Scope, Nature and Constraints of rural |
|----------------------|---|
| | • To study Implications of 73rd CAA on Planning, Development and Governance of Rural Areas |
| Course Objectives | • An exploration of human values, which go into making a 'good' human being, a 'good' professional, a 'good' society and a 'good life' in the context of work life and the personal life of modern Indian professionals |
| | • To understand the Nature and Type of Human Values relevant to Planning Institutions |
| | Student will be able to |
| | • Apply knowledge for Rural Development |
| Course | • Apply knowledge for Management Issues. |
| Course Outcomes | • Apply knowledge for Initiatives and Strategies. |
| Outcomes | • Develop acumen for higher education and research. |
| | • Master the art of working in group of different nature. |
| | • Develop confidence to take up rural project activities independently. |

| Module | Contents | Hours |
|--------|--|-------|
| 1 | Introduction to Rural Development Meaning, nature and scope of | 08 |
| | development; Nature of rural society in India; Hierarchy of settlements; | |
| | Social, economic and ecological constraints for rural development. | |
| | Roots of Rural Development in India Rural reconstruction and | |
| | Sarvodaya programme before independence; Impact of voluntary effort | |
| | and Sarvodaya Movement on rural development; Constitutional | |
| | direction, directive principles; Panchayati Raj - beginning of planning | |
| | and community development; National extension services. | |
| 2 | Post-Independence rural Development Balwant Rai Mehta Committee - | 04 |
| | three tier system of rural local. Government; Need and scope for | |
| | people's participation and Panchayati Raj; Ashok Mehta Committee - | |
| | linkage between Panchayati Raj, participation and rural development. | |
| 3 | Rural Development Initiatives in Five Year Plans Five Year Plans and | 06 |
| | Rural Development; Planning process at National, State, Regional and | |
| | District levels; Planning, development, implementing and monitoring | |

| | organizations and agencies; Urban and rural interface - integrated | |
|---|---|----|
| | approach and local plans; Development initiatives and their | |
| | convergence; Special component plan and sub-plan for the weaker | |
| | section; Micro-eco zones; Data base for local planning; Need for | |
| | decentralized planning; Sustainable rural development. | |
| 4 | Post 73rd Amendment Scenario 73rd Constitution Amendment Act, | 04 |
| | including - XI schedule, devolution of powers, functions and finance; | |
| | Panchayati Raj institutions - organizational linkages; Recent changes in | |
| | rural local planning; Gram Sabha - revitalized Panchayati Raj; | |
| | Institutionalization; resource mapping, resource mobilization including | |
| | social mobilization; Information Technology and rural planning; Need | |
| | for further amendments. | |
| 5 | Values and Science and Technology Material development and its | 10 |
| | values; the challenge of science and technology; Values in planning | |
| | profession, research and education. Types of Values Psychological | |
| | values — integrated personality; mental health; Societal values — the | |
| | modern search for a good society; justice, democracy, rule of law, values | |
| | in the Indian constitution; Aesthetic values — perception and enjoyment | |
| | of beauty; Moral and ethical values; nature of moral judgment; Spiritual | |
| | values; different concepts; secular spirituality; Relative and absolute | |
| | values; Human values— humanism and human values; human rights; | |
| | human values as freedom, creativity, love and wisdom. | |
| 6 | Ethics Canons of ethics; ethics of virtue; ethics of duty; ethics of | 04 |
| | responsibility; Work ethics; Professional ethics; Ethics in planning | |
| | profession, research and education | |

| ISL701 | Industrial Process Control-Lab Practice | | | | | | |
| Course objectives | To impart the knowledge of different industrial unit operations. To make them capable to design and develop instrumentation | | | | | | |
| | and control scheme for industrial processes. 3. To give them exposure to work in process industry. 4. To explain students about hazardous area and safety system. | design | | | | | |
| Course Outcomes | The students will be able to | | | | | | |
| | 1. Explain working and control of various heat tran operations | sfer unit | | | | | |
| | 2. Explain working and control of various heat and mass unit operations | s transfer | | | | | |
| | 3. Explain the miscellaneous process equipment and their c 4. Describe the processes of various continuous industries and instrumentation involved in them. | | | | | | |
| | 5. Describe the processes of various batch process industinstrumentation involved in them.6. Classify hazardous areas in the industry. | stries and | | | | | |

Syllabus: Same as that of Subject ISC701 Industrial Process Control.

List of Laboratory Experiments/Assignments:

| Sr. No. | Detailed Content | CO Mapping |
|------------|--|-------------|
| 1 | Demonstrate the operation and control scheme of Heat exchanger | CO1 |
| 2 | Learn working of various Unit Operations (Boilers/furnace / Distillation column etc.) using online learning resources. | CO2 |
| 3 | Demonstrate the reactor control system. | CO2 |
| 4 | Demonstrate the operation & control scheme of a compressor. | CO3 |
| 5 | Prepare a report on any one industry. | CO4 and CO5 |
| 6 | Develop some charts on hazardous area classification. | CO6 |
| 7 | Assignment/Exercise on heat transfer unit operations- heat exchanger, boilers | CO1 |
| 8 | Assignment/Exercise on heat transfer unit operations-evaporator, furnace | CO1 |
| 9 | Assignment/Exercise on heat and mass transfer unit operations-Distillation, dryers | CO2 |
| 10 | Assignment/Exercise on heat and mass transfer unit operations-Crystallization, reactor | CO2 |
| 11 | Assignment/Exercise on miscellaneous equipment | CO3 |
| 12 | Assignment/Exercise on hazardous area classification | CO6 |
| 13 | Assignment/Exercise on continuous process industries | CO4 |
| 14 | Assignment/Exercise on batch process industries | CO5 |

Any other additional experiments/assignments based on syllabus which will help students to understand topic/concept.

• Industry visit is advised to understand the unit operations, industrial processes and their control.

Practical/Oral Examination:

Oral examination will be based on entire syllabus.

Term Work:

Term work shall consist of minimum four experiments and four assignments.

The distribution of marks for term work shall be as follows:

| Laboratory work (Experiments/assignments) : 10 Marks | | | | | |
|--|---|----------|--|--|--|
| Laboratory work (programs / journal) | : | 10 Marks | | | |
| Attendance | : | 5 Marks | | | |

The final certification and acceptance of term work ensures the satisfactory performance of

Laboratory work and minimum passing in the term work.

| ISL702 | | | | | | |
| Course objective | To make students perform experiments based on the principle and various Biomedical Instruments used for Bio-potential measureme To develop skills in the design of various biomedical instru- in diagnosis and life-support. | nts | | | | |
| Course Outcome | Students will be able 1. To measure and identify various Bio-potentials with their specific 2. To observe and plot various Physiological parameters specifications. 3. To measure the various cardiovascular parameters by Designing circuitry. 4. To realise the circuitry of different life support instruments, like defibrillator. 5. To distinguish between the various medical imaging tec comparing, principle and concept involved in each of the techniqu 6. To describe the significance of electrical safety in biomedical mean | with their g the related e pacemaker, chniques by ie. | | | | |

Syllabus: Same as that of Subject ISC702 Biomedical Instrumentation.

List of Suggested Laboratory Experiments:

| Sr. No. | Detailed Content | CO Mapping |
|---------|--|------------|
| 1 | Demonstration and working of instruments like ECG and PCG. | CO1 |

| 2 | Demonstration and working of instruments like EMG and EEG. | C01 |
|----|---|-----|
| 3 | Study of electrodes for various biomedical applications. | CO1 |
| 4 | To measure Blood pressure by indirect method. | CO2 |
| 5 | To study Pacemaker and various waveforms or Design and implement pacemaker circuit. | CO4 |
| 6 | To study Defibrillator and voltage waveforms or Design and implementDefibrillator circuit. | CO4 |
| 7 | Design of ECG amplifier and testing of gain frequency response with weak input signal. | CO3 |
| 8 | To design and implement ECG signal conditioning circuits with different parameter. | CO3 |
| 9 | To design and implement EMG Quantification circuit. | CO2 |
| 10 | To study Hemodialysis, Heart/Lung machine based models. | CO4 |
| 11 | ECG simulation on PC / Microcontroller. | CO3 |
| 12 | Study of working of pulse oxymeter / Heart rate meter. | CO3 |
| 13 | To study respiration rate meter / respiration parameter measurement. | CO2 |
| 14 | Study on Medical Imaging Techniques | CO5 |
| 15 | Study on Electrical Safety | CO6 |

Any other additional experiment based on syllabus which will help students to understand topic/concept

Practical/Oral Examination:

Practical/Oral examination will be based on entire syllabus.

Term Work:

Term work shall consist of minimum 08 experiments from the above given list and 02 assignments from imaging techniques module and electrical safety module.

The distribution of marks for term work shall be as follows:

Laboratory work (Experiments/Assignments) : 10 Marks Laboratory work (programs / journal) : 10 Marks Attendance : 5 Marks

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

| Subject code | Subject Name | Teaching scheme | | | Credit assigned | | | |

| 3 | Compute and visualize 2-D DFT, DCT of Images. | CO2 |

| 4 | Point processing operations like Image negative, brightness adjustment, contrast stretching, Threshold, Log transformation, Power law transformations, Gray level slicing with or without background. | CO3 |
|----|---|-----|
| 5 | Image Enhancement techniques by arithmetic and logic operations. | CO3 |
| 6 | Generate and plot Image Histogram and Histogram Equalization. | CO4 |
| 7 | Image Analysis and interpret the result by using Spatial filter. | CO5 |
| 8 | Image smoothing and Sharpening in frequency domain. | CO5 |
| 9 | Implementing Image acquisition and degradation process by different noises and | CO5 |
| 10 | Edge detection by using Robert operator, Prewitt operator, Sobel operator and compare the result. | CO6 |
| 11 | Morphological operation of Images like Dilation, Erosion, Opening, Closing, Boundary Detection. | CO6 |
| 12 | Image segmentation such as point, line, edge detection. | CO6 |

Any other additional experiments based on syllabus which will help students to understand topic/concept.

Note: Students can use any Computer simulation software programing platform like MATLAB/SCILAB.

Oral Examination:

Oral examination will be based on entire syllabus.

Term Work:

Term work shall consist of Eight experiments.

The distribution of marks for term work shall be as follows:

| Laboratory work (Experiments) | : 10 Marks |
|-------------------------------------|------------|
| Laboratory work (programs /journal) | : 10 Marks |
| Attendance | : 5 Marks |

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

| Course Objectives | To present architecture of the mechatronics system design To study on broad spectrum the characteristics of the mechanical a electrical actuators and their selection for mechatronic systems. Development of process plan and templates for design of mechatron systems. | | | | | | |
| Course Outcomes | The students will be able to 1. Apply the concept of system modelin 2. Calculate performance characteristics 3. Learn the working of actuators for a 4. Design feedback and intelligent cont 5. Describe mechatronics system valida 6. Integrate the components in mechatro | s of sensors mechatronic system. rollers ition | | | | | |

Syllabus: Same as that of Subject ISDLO7034 Mechatronics.

List of Laboratory Experiments/ Assignments:

| Sr. No. | Detailed Content | CO Mapping |
|------------|---|------------|
| 1 | Modeling and simulation of basic electrical, hydraulic and pneumatic systems using any virtual instrumentation software like LabVIEW. | CO1 |
| 2 | Calculate static and dynamic characteristics of position/force/tactile sensors | CO2 |
| 3 | Design of circuits with logic sequence using Electro pneumatic trainer kits. | CO3 |
| 4 | Simulation of basic Hydraulic, Pneumatic and Electric circuits using any software | CO3 |

| 5 | Electro pneumatic applications using PLC | CO3 |
|----|--|-----|
| 6 | Speed Control of AC & DC drives | CO3 |
| 7 | Servo controller interfacing for DC motor | CO4 |
| 8 | PID controller interfacing | CO4 |
| 9 | Implementation of fuzzy controller for level or temperature control | CO4 |
| 10 | Stepper motor interfacing with Micro controller (i) Full step resolution (ii) half step resolution | CO4 |
| 11 | Assignment on Components based modular design and system validation | CO5 |
| 12 | Computerized data logging system with control for process variables like pressure, flow and temperature. | CO6 |
| 13 | Case study on any one mechatronics system | CO6 |

Any other additional experiments / case studies based on syllabus which will help students to understand topic/concept.

**Industry visit is advised to understand the Mechatronics subject.

Practical/Oral Examination:

Oral examination will be based on entire syllabus.

Term Work:

Term work shall consist of minimum seven experiments and 01 case study.

The distribution of marks for term work shall be as follows:

| Laboratory work (Experiments/assignments/a | nts) | : 10 Marks |
|--|------|------------|
| Laboratory work (programs / journal) | | : 10 Marks |
| Attendance | | : 5 Marks |
| | | |

The final certification and acceptance of term work ensures the satisfactory performance of Laboratory work and minimum passing in the term work

Term Work:

The final year students have already under gone project assignment in their third year in Mini Project I and II. In final year, group of maximum **four** students will be completing a comprehensive project work based on the courses studied. The project work may be internally assigned or externally assigned by the research institutes and industry etc. Each group will be assigned one faculty as a supervisor. This project work in final year may be extension of the Mini Project work done in third year.

The main intention of project work is to enable students to apply the knowledge and skills learned out of courses studied to solve/implement predefined practical problem. The project work may be beyond the scope of curriculum of courses taken or may be based on the courses but thrust should be

- Learning additional skills
- Development of ability to define, design, analysis and implementation of the problem and lead to its accomplishment with proper planning
- Learn the behavioral science by working in a group
- The project area may be selected in which the student intend to do further education and/or may be either intend to have employment or self employment
- The topic of project should be different and/or may be advancement in the same topic of Mini Project
- The students may use this opportunity to learn different computational techniques as well as some model development. This they can achieve by making proper selection of project work.

The college should keep proper assessment record of the progress of project and at the end of the semester it should be assessed for awarding TW marks. The TW should be examined by approved internal faculty appointed by the head of the institute on the basis of following:

- Scope and objective of the project work.
- Extensive Literature survey.
- Progress of the work (Continuous assessment)
- Report in prescribed University format.

An approved external examiner and internal examiner appointed by the head of the institute together will assess during oral examination. The oral examination is a presentation by the group members on the project along with demonstration of the work done. In the examination each individual student should be assessed for his/her contribution, understanding and knowledge gained.

| Course objective | To provide knowledge of Instrumentation Project & Detailed Engineering t in the EPC Consultancy. To make the students capable of executing Project Deliverables and End | 1 |
| | activities of Project Documentation. | |
| Course | The students will able to: | |
| Outcome | Interpret types of project and execute it by knowing relationship between designer and constructor. | customer, |
| | 2. Use standards in instrumentation project. | |
| | 3. Design engineering documents such as loop diagram, hook-up, JB schedule | |
| | 4. Develop and test system integration. | |
| | 5. Schedule and evaluate activities like procurement, commissioning, installat | ion. |
| | 6. Support and evaluate documentation software packages used in industry. | |

Prerequisite: Knowledge of standards, basics of Sensor, transducer, process loops, control valve.

| Module | Content | Hrs | CO Mapping |
|--------|---|-----|---------------|
| 1 | The Project and Project Team: Introduction, Types of project, constraint's predictability, structure, flow and deliverables, Need and techniques used for Project Planning and Scheduling, software used for Project Planning and Scheduling The Project Team : Customer, designer and constructor | 10 | CO1 |
| 2 | Standards used in instrumentation project: ISA, ANSI, & ASTM, ASME, NFPA, NEMA, SAMA. Engineering Documents Part-I: Need for engineering document, general guidelines for development of document, project stage, purpose, scope, contents, references for document, team of creation and users. 1) Process Flow Diagram (PFD) and Material Balance Sheet (MBS) 2) Piping and Instrumentation diagrams (P&ID) – practical applications. 3) Instrument Index Sheet 4) Instrument specifications sheet- for temperature, pressure, level, flow instruments and control valves. | 08 | CO2 |
| 3 | Engineering Documents Part-II 1) Loop diagrams- pneumatic, electronic and digital data types. 2) Instrument Location Plan 3) Cable and Tray Routing and Cable Schedule 4) JB Schedule 5) Air header schedule 6) Instrument Hook- up diagrams - for control valve, transmitters (DP in liquid service, dry gas service,) Thermocouple, Temperature switch line mounted, flow transmitter, connections for air supply and output. etc. 7) BOM for erection 8) Logic diagrams, 9) SAMA flow diagram | 10 | CO3 |
| 4 | Systems Integration: Division of labour, control logic specification, HMI specification (development of mimic and graphic), System Architecture design, Network single line diagram generation, I/O address assignment (Partitioning)-Hardware & software address, Other tasks like -System testing, Safety Instrumented System (SIS), Safety Integrated Level (SIL), control room layout design, types of control system cabinet design. | 07 | CO4 |
| 5 | Procurement, Installation and Commissioning: Procurement: Engineering Procurement procedure, PO format, preparation of tender documents, bids, technical bid evaluation. Installation of instruments- Installation standards (stanchion, impulse tubing, clamping) installation of instrument junction box, earthing system, cable laying (cable trays, cable types, cable glands), tubing, instrument installation guidelines (for pressure instruments, DP transmitter, temperature and flow instruments, control valve.) Inspection: Need for Inspection, General Inspection Guidelines | 10 | CO5 |

| | Documents for Inspection- Factory acceptance test (FAT) ,Siteacceptance test (SAT).Commissioning: Pre-commissioning Procedures, stages, check outprocedure of control valve, DP transmitter etc. Calibration, testing | | |
|---|---|----|-----|
| | of instruments, operation and maintenance manual. | | |
| 6 | Documentation Software Packages: | 03 | CO6 |
| | Advantages of using software packages for documentation. Overview | | |
| | of documentation software packages used in industry. | | |

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Theory Examination:

- 1. Question paper will comprise of 6 questions, each carrying 20 Marks.
- 2. Total 4 questions need to be solved.
- 3. Question No. 1 will be compulsory and based on entire syllabus wherein sub questions of 4 to 5 marks will be asked.
- 4. Remaining questions will be mixed in nature.
- 5. In question paper weight age of each module will be proportional to number of respective Lecture hours as mentioned in the syllabus.

| Course objective | To provide an understanding on the fundamentals of neura and fuzzy systems. To learn the different intelligent techniques for control To gain knowledge in Expert systems To gain knowledge in genetic algorithm. | l network |
| Course Outcome | The students will able to Identify various networks and learning algorithms in artifinetwork (ANN). Define Fuzzy set, rules and membership function and also defuzzification for a given problem. Identify areas of application for Expert Systems. Apply the concepts of ANN and Fuzzy Logic in solving e problems and implementing controllers. Discuss various concepts of Genetic Algorithm Identify various hybrid control strategies. |) |

Prerequisite: Knowledge of control systems, optimization technique, expert system, Neural network and Genetic algorithm.

| Module | Contents | Hrs | CO Mapping |
|--------|--|-----|---------------|
| 1 | Introduction to Artificial Neural Network (ANN) Neuron, nerve structure and synapse –Artificial Neuron and its model, activation functions, neural network architecture –Single Layer Perceptron– Multi Layer Perceptron – Back propagation algorithm (BPA). Supervised and Unsupervised learning. Associative Networks - Hopfield networks, Boltzmann machines. | 09 | CO1 |
| 2 | Introduction to Fuzzy Logic Fuzzy set theory – Fuzzy sets – Operation on Fuzzy sets – Scalar cardinality, fuzzy cardinality, union and intersection, complement, equilibrium points, aggregation, projection, composition, decomposition, cylindrical extension, fuzzy relation – Fuzzy membership functions, De- fuzzification. | 09 | CO2 |
| 3 | Introduction to Expert System What are Expert Systems, Features of Expert System, Basic activities of expert system and the areas in which they solve problems, Prospector systems-features, working. Knowledge representation in expert systems- using rules semantic nets, frames, Types of tools available for expert system building, Stages in the development of expert system tools. Building an Expert system. | 09 | CO3 |
| 4 | Neural Networks and Fuzzy Logic for ControlFamiliarization of Neural Network Control and Fuzzy Tool Box.Development of PID control using ANN and Fuzzy Logic. | 06 | CO4 |
| 5 | Genetic Algorithm Basic concept of Genetic algorithm – flow chart of GA – Genetic representations – encoding – Initialization and selection, Genetic operators– Mutation, Generational Cycle, applications – Concepts on search techniques – Tabu search, Ant-colony search and Particle Swarm Optimization (PSO). | 09 | CO5 |
| 6 | Hybrid Control Schemes Neuro fuzzy systems –Adaptive neuro fuzzy inference system (ANFIS) – Optimization of membership function and rule base using Genetic Algorithm and PSO – Case study – Introduction to Support Vector Regression – Familiarization of ANFIS Tool Box. | 06 | CO6 |

Internal Assessment consists of two tests out of which, one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Theory Examination:

- 1. Question paper will comprise of 6 questions, each carrying 20 Marks.
- 2. Total 4 questions need to be solved.
- 3. Question No. 1 will be compulsory and based on entire syllabus wherein sub questions of 4 to 5 marks will be asked.
- 4. Remaining questions will be mixed in nature.
- 5. In question paper weight age of each module will be proportional to number of respective Lecture hours as mentioned in the syllabus.

| Course objectives | To create awareness of energy resources and its scenario in worldwide. To study the concept of power generation using various resources. To study the role of Instrumentation in various power plants. To study and compare various power plants for optimal performance To acquire students the knowledge about hazards and safety i power plants. | 2. |
| Course Outcomes | The students will be able to: 1. Identify the energy sources and explain power generation. 2. Describe operation and control of various equipment in ther plant. 3. Select the sites for hydroelectric power plants and explain its of 4. Explain the power generation and control of Nuclear power plant. 5. Describe the non-conventional energy resources. 6. Compare different types of power plants. | |

Prerequisite: Knowledge of energy resources, types of power plants and power generation.

| Module | Content | Hrs | CO Mapping |
|--------|--|-----|------------|
| 1 | Introduction: Energy sources, their availability, worldwide energy production, energy scenario of India. Introduction to Power generation, load curve, load factor. Classification of energy generation resources. | 04 | CO1 |
| 2 | Thermal Power Plant - Method of power generation, layout and energy conversion process. Types of Turbines & their control. Types of Boilers and their control. Types of Generators and their control, Condensers. Types of Pumps and Fans, variable speed pumps and Fans, Material handling system, study of all loops-water, steam, fuel etc. Schematics of Gas turbine and Diesel power plant. Application of DCS in power plants. | 14 | CO2 |
| 3 | Hydroelectric Power Plant - Site selection, Hydrology, Estimation electric power to be developed, classification of Hydropower plants. Types of Turbines for hydroelectric power plant, pumped storage plants, storage reservoir plants. | 06 | CO3 |
| 4 | Nuclear Power Plant – Concept of energy generation from nuclear fission, control of chain reaction. Schematics of Nuclear power plant, types of reactors, reactor control, safety measures. | 08 | CO4 |
| 5 | Non-conventional Energy Resources – Wind Energy: Power in wind, Conversion of wind power, Aerodynamics of wind turbine, types of wind turbine and their modes of operation, power control of wind turbines, Betz limit, Pitch & Yaw control, wind mill, wind pumps, wind farms, different generator protections, safety. Solar Energy: Solar resource, solar energy conversion systems. Solar PV technology: Block diagram of PV system, advantages and limitations. Solar thermal energy system: Principle, solar collector and its types, solar concentrator and its types, safety. Introduction to Modern Biomass, Bio-fuels, Geothermal energy, Tidal energy and Ocean thermal energy. | 12 | CO5 |
| 6 | Comparison of different types of power plant: thermal power plant, hydro electric power plant, wind, solar, nuclear power plant on the basis of: Performance, efficiency, site selection, Economics-capital and running, safety. Introduction to Hybrid Power Generation concept. | 04 | CO6 |

Internal Assessment:

| ILO8021 | Project Management | 20 | 20 | 20 | 80 | 03 | - | 100 |

| Course Objectives | To familiarize the students with the use of a structured methodology/approach for each and every unique project undertaken, including utilizing project management concepts, tools and techniques. To appraise the students with the project management life cycle and make them knowledgeable about the various phases from project initiation through closure. |
|----------------------|--|
| Course Outcomes | Student will be able to Apply selection criteria and select an appropriate project from different options. Write work break down structure for a project and develop a schedule based on it. Identify opportunities and threats to the project and decide an approach to deal with them strategically. Use Earned value technique and determine & predict status of the project. Capture lessons learned during project phases and document them for future reference |

| Module | Contents | Hours | | | | | | |
|--------|--|-------|--|--|--|--|--|--|
| 1 | Project Management Foundation: Definition of a project, Project Vs | 5 | | | | | | |
| | Operations, Necessity of project management, Triple constraints, Project | | | | | | | |
| | life cycles (typical & atypical) Project phases and stage gate process. | | | | | | | |
| | Role of project manager. Negotiations and resolving conflicts. Project | | | | | | | |
| | management in various organization structures. PM knowledge areas as | | | | | | | |
| | per Project Management Institute (PMI). | | | | | | | |
| 2 | Initiating Projects: How to get a project started, Selecting project strategically, Project selection models (Numeric /Scoring Models and Non-numeric models), Project portfolio process, Project sponsor and creating charter; Project proposal. Effective project team, Stages of team development & growth (forming, storming, norming & performing), team dynamics. | 6 | | | | | | |
| 3 | Project Planning and Scheduling: Work Breakdown structure (WBS) | 8 | | | | | | |
| | and linear responsibility chart, Interface Co-ordination and concurrent | | | | | | | |
| | engineering, Project cost estimation and budgeting, Top down and | | | | | | | |

| | bottoms up budgeting, Networking and Scheduling techniques. PERT, | |
|---|--|---|
| | CPM, GANTT chart. Introduction to Project Management Information | |
| | System (PMIS). | |
| 4 | Planning Projects: Crashing project time, Resource loading and | 6 |
| | leveling, Goldratt's critical chain, Project Stakeholders and | |
| | Communication plan. Risk Management in projects: Risk management | |
| | planning, Risk identification and risk register. Qualitative and | |
| | quantitative risk assessment, Probability and impact matrix. Risk | |
| | response strategies for positive and negative risks | |
| 5 | Executing Projects: Planning monitoring and controlling cycle. | 8 |
| - | Information needs and reporting, engaging with all stakeholders of the | - |
| | projects. Team management, communication and project meetings. | |
| | Monitoring and Controlling Projects: Earned Value Management | |
| | techniques for measuring value of work completed; Using milestones for | |
| | measurement; change requests and scope creep. Project audit. | |
| | Project Contracting Project procurement management, contracting and | |
| | outsourcing, | |
| 6 | | 6 |
| 6 | Project Leadership and Ethics: Introduction to project leadership, | 6 |
| | ethics in projects. Multicultural and virtual projects. | |
| | Closing the Project: Customer acceptance; Reasons of project | |
| | termination, Various types of project terminations (Extinction, | |
| | Addition, Integration, Starvation), Process of project termination, | |
| | completing a final report; doing a lessons learned analysis; | |
| | acknowledging successes and failures; Project management templates | |
| | and other resources; Managing without authority; Areas of further study. | |

| Objectives | as International treaty procedures | | | | | | | |
| Objectives | • To get acquaintance with Patent search and patent filing procedure and | | | | | | | |
| | • applications | | | | | | | |
| | Student will be able to | | | | | | | |
| Course | understand Intellectual Property assets | | | | | | | |
| Outcomes | assist individuals and organizations in capacity building | | | | | | | |
| Outcomes | • work for development, promotion, protection, compliance, and | | | | | | | |
| | enforcement of Intellectual Property and Patenting | | | | | | | |

| Module | Contents | Hours |
|--------|--|-------|
| 1 | Introduction to Intellectual Property Rights (IPR): Meaning of IPR, | 05 |
| | Different category of IPR instruments - Patents, Trademarks, | |
| | Copyrights, Industrial Designs, Plant variety protection, Geographical | |
| | indications, Transfer of technology etc. | |
| | Importance of IPR in Modern Global Economic Environment: | |
| | Theories of IPR, Philosophical aspects of IPR laws, Need for IPR, IPR | |
| | as an instrument of development | |
| 2 | Enforcement of Intellectual Property Rights: Introduction, Magnitude | 07 |
| | of problem, Factors that create and sustain counterfeiting/piracy, | |
| | International agreements, International organizations (e.g. WIPO, WTO) | |
| | activein IPR enforcement | |
| | Indian Scenario of IPR: Introduction, History of IPR in India, | |
| | Overview of IP laws in India, Indian IPR, Administrative Machinery, | |
| | Major international treaties signed by India, Procedure for submitting | |
| | patent and Enforcement of IPR at national level etc. | |
| 3 | Emerging Issues in IPR: Challenges for IP in digital economy, e- | 06 |
| | commerce, human genome, biodiversity and traditional knowledge etc. | |
| 4 | Basics of Patents: Definition of Patents, Conditions of patentability, | 07 |
| | Patentable and non-patentable inventions, Types of patent applications | |

| | (e.g. Patent of addition etc), Process Patent and Product Patent, Precautions while patenting, Patent specification Patent claims, Disclosures and non-disclosures, Patent rights and infringement, Method of getting a patent | |
|---|--|----|
| 5 | Patent Rules: Indian patent act, European scenario, US scenario, Australia scenario, Japan scenario, Chinese scenario, Multilateral treaties where India is a member (TRIPS agreement, Paris convention etc.) | 08 |
| 6 | Procedure for Filing a Patent (National and International): Legislation and Salient Features, Patent Search, Drafting and Filing Patent Applications, Processing of patent, Patent Litigation, Patent Publicationetc, Time frame and cost, Patent Licensing, Patent Infringement Patent databases: Important websites, Searching international databases | 07 |

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project

- 1. Question paper will comprise of 6 questions, each carrying 20 marks.
- 2. Total four questions need to be solved.
- 3: Q.1 will be compulsory, based on entire syllabus wherein sub questions of 2 to 5 marks will be asked.
- 4: Remaining question will be randomly selected from all the modules.

| ISL801 | Instrumentation Project Documentation and Execution | 1 | | | | | |
| Course objective | To provide knowledge of types and execution of I&C type project This Course aims to explain Project deliverables and engineering activities of project documentation. To get acquainted with commercial software used for documentation. | | | | | | |
| Course Outcome | The students will able to 1. Apply standards used in instrumentation project for predeliverables. 2. Interpret, design and construct documents such as PFD, P sheet. 3. Apply ISA specification data sheet / loop standard, to prepare specification sheet and construct loop wiring diagram. 4. Interpret, design and construct Hook-up diagram, and dever prepare different project schedule. 5. Select and apply procurement, installation procedure commissioning and commissioning activities with Inspection. 6. Select and support documentation software packages used in fille. | &ID, Index Instrument of skill to and pre- | | | | | |

Syllabus: Same as that of Subject ISC801 Instrumentation Project Documentation and Execution.

List of Laboratory Experiments/ Assignments:

| Sr. No. | Detailed Content | CO Mapping |
|------------|---|------------|
| 1 | Summarize instrument/unit symbols and identification, tagging and line designation procedure from ISA/ANSII Standard | C01 |
| 2 | Apply symbols and identification standard for preparation of graphical document such as Process Flow Diagrams. | CO2 |
| 3 | To develop of Piping & Instrumentation Diagram using PFD of Expt-2. | CO2 |
| 4 | Prepare instrument index sheet for tags used in P&ID of Expt-3. | CO2 |
| 5 | Prepare ISA specification forms (for temperature, pressure, level ,flow instruments, CV) | CO3 |
| 6 | Develop loop wiring diagram of pneumatic and electronic loops. | CO3 |
| 7 | Develop sample hook-up drawing and prepare BOM. | CO4 |
| 8 | Study and Development of Detailed Engineering schedules.(Project schedule / Cable schedule / JB schedule / AH schedule) | CO4 |
| 9 | Learn procedure to perform pre-commissioning activities.(Hydro Test / Loop checking / Trouble shooting /calibration of DPT or Control valve etc) | CO5 |
| 10 | Survey of instrumentation software and study different features | CO6 |

Practical/Oral Examination:

Oral examination will be based on entire syllabus.

Term Work:

Term work shall consist of Laboratory work which includes minimum study of eight experiments/ assignments / Creation of Documents

Other task: (Optional) Visit to any one Engineering consultants office /organizations to understand their Working Environment & submission of Report.

| The distribution of marks for term work shall be as follows: | |
|--|------------|
| Laboratory work (Experiments/Assignments) | : 10 Marks |
| Laboratory work (programs / journal) | : 10 Marks |
| Attendance (Theory and Practical) | : 05 Marks |

The final certification and acceptance of term work ensures the satisfactory performance of laboratory work and minimum passing in the term work.

Term Work:

The final year students have already under gone project assignment in their seventh semester and in this semester the students are expected to continue the project work of stage I.

The college should keep proper assessment record of the progress of project and at the end of the semester it should be assessed for awarding TW marks. The TW should be examined by approved internal faculty appointed by the head of the institute on the basis of following:

- 1. Scope and objective of the project work.
- 2. Extensive Literature survey.
- 3. Progress of the work (Continuous assessment)
- 4. Design, implementation, and analysis of the project work.
- 5. Results, conclusions and future scope.
- 6. Report in prescribed University format.

An approved external examiner and internal examiner appointed by the head of the institute together will assess during oral examination. The oral examination is a presentation by the group members on the project along with demonstration of the work done. In the examination each individual student should be assessed for his/her contribution, understanding and knowledge gained.
