Student Development Programs

We organize student development programs every year. Students learn basic knowledge and skills during regular academics. To build professional solutions, they must be made aware of industry practices. SDPs help students enhance their skills in the latest technologies like Springboot, MERN, Mongodb...We organize SDPs every year to make students industry-ready. We call alumni and industry experts to impart knowledge.

Objectives:
1. Enhance technical proficiency in coding.
2. Expose students to techniques to build professional solutions.
3. Expose students to latest tools.
4. Expose students to industrial best practices.

Outcomes:
1. Analyze a given problem.
2. Build professional solutions to a given problem.
3. Deploy solutions.
4. Test the given solution
